

Human

Humans (*Homo sapiens*) are the originating species for many species in the [SARPIverse](#). In most cases, humans are synonymous with [Neplesians](#). To create a human character, please use a faction-appropriate creation guide.

Baseline Humans

Baseline humans (*Homo sapiens sapiens*) are very rare but can be found in the [Yamatai Star Empire](#) as citizens who survived (or are children of survivors) of the [Great Plague of YE 08](#) and in the [Democratic Imperium of Nepleslia](#) in cases where genetic lineage is “unmixed” in contrast to the general population

mixing with various genetically altered lineages (e.g. mutants and [ID-SOL](#)) that has occurred over hundreds of years since the human diaspora. Baseline humans also have built other colonies (such as [Khorsovarolor](#)) that continue to be discovered.

For real-world information about humans, see  [Human](#).

Human Subspecies

There are several major subspecies of humans in the [SARPiverse](#).

Geshrin

The NH-1 Geshrin were a genetically modified version of the [Nepleslian/Human](#) species. They lived on Yamatai from approximately [YE 01](#) to [YE 29](#) and were almost totally replaced by the [NH-22C Yamataian](#) and later the [Minkan](#) race.

Shortly after the old Uesureyan colonization of planet [Yamatai \(Planet\)](#) (Geshrintall), the colonists working for Uesu Heavy Industries (part of which later became [PNUgen Corporation](#)) began work on creating two new races in what later became known as the “Perfect Evolution” project. The intent of the project was simple: to replace humanity with a pair of new, superior species. The first would be a warrior, and the second, a civilian. The result was the NH-1 Warmaiden (produced in cooperation with the now-defunct Geshrinari Armaments), followed by the first NH-1 Geshrins, who were mainly mirrored after the Japanese and Nordic humans that manned the original colony ships. Soon, with Soul-Transfer (ST) technology made readily accessible by the government, nearly the entire population was 'upgraded' to the new species.

Geshrin as a species have mostly been replaced (via mental transfers) by their improved version, the Yamataian, and are considered obsolete.

In [YE 29](#), they were barred from joining the [Star Army of Yamatai](#) because of their inherent weaknesses compared to Yamataians and [Nekovalkyrja](#), but this order was rescinded the following year. See: [Species Restriction Order of YE 29](#)

Geshrin are largely immune to disease, and are of superior intellect and body than their regular human counterparts. Their lifespan can last well over 150 years, with “old age” kicking in only in the last 50 or so. Geshrin reproduce sexually like earlier humans do (there are roughly equal numbers of males and females). The gestation period for babies, however, is only 3 months. Once born a Geshrin matures at a rate consistent with humans.

Geshrins look like your typical human and can look like any ethnicity and can have just about any hair or eye color. They typically have average builds but it is unheard of to see a Geshrin that is overweight or obese. The average height of a male is 6' 1" while women tend to be around 5'6". Their average weight tend to be around 165lbs or 130lbs (respectively). And women tend to average as a C cup in regards to their bust size. Their skin tones run the full range of their human counterparts, although due to the ancestry, there is a majority of white and Asian-derived skin tones.

Nepleslians

See: [Nepleslian](#)

Other Human-Related Species

These are species that are related to humans in biology or appearance, listed alphabetically.

1. [Abwehrans](#) are suspected to be genetically modified humans due to their appearance but the connection is unclear.
2. [Elves](#) are a type of human.
3. [Elysian Patricians](#) are a form of human with wings. Their origin is unclear, but they are close enough genetically that they can interbreed with humans to create [Plebeians](#). [Caelisolans](#) are genetically engineered combinations of Patricians and Plebeians.
4. [Freespacers](#): [Type One](#) are humans and [Type Two](#) are human-derived clones.
5. [Helashio](#) appear to be basically human, except derived by route of different primate origin on a different planet¹⁾.
6. The [ID-SOL](#) are a genetically-enhanced subspecies of supersoldiers.
7. The [Iromakuanhe](#) race is descended from human space travelers.
8. [Kudhacari](#) have human faces (relationship unclear).
9. [Lorath Matriarchy](#) look like humans with wings. The connection is still unclear.
10. Early [Nekovalkyrja](#) models (NH-2, NH-7, NH-10) included some human DNA. They were also mostly human in appearance except they had catlike ears, a tail, more colorful hair and skin. Later model Nekovalkyrja retained this appearance.
11. The Nekovalkyrja-derived [Nightmare Type Mishhuvurthyar](#) has a human face and body shape.
12. The [Saal](#) and [Sahaad](#) are descendants of humans.
13. [Separa'Shan](#) have human-like upper bodies.
14. Yamataians ([NH-22C/Jiyuuian](#) and [NH-31 Minkan](#)) generally look human but are not humans; they are a completely synthetic Nekovalkyrja species. By design, Humans and Yamataians are able to have Yamataian children. Minkan have a wider range of skin and hair colors than baseline humans.

OOC Notes

Article by [Wes](#).

Setting Restrictions on Humans

1. The location of Earth remains unknown and it should not be discovered in the roleplay without a community consensus.
2. The creation of more human-*looking* species that are *not* human is currently restricted for the sake of encouraging more diverse species in the setting. As you can see, we have way too many human-looking species already!
3. Creation of new [factions](#) that use actual humans as their main species is fine.
