

# Project Prometheus

Project Prometheus was a massive experimental undertaking conducted by [Star Army Research Administration](#) that focused on the research and use of 🧠 [monopoles](#).

## History

In [YE 31](#), SARA constructed a Jupiter-size particle accelerator in the [New Vicky \(UX-19\)](#) system, surrounding UX-19 VI.

In [YE 41](#), during the [Kuvexian Invasion of YE 41](#), scientists took all the data and self-destructed the particle accelerator to prevent it from being captured.

**RP Idea: The scientists need help getting out of the area with their data.**
