

Star Army Footlocker, Type 32

The Star Army Footlocker is an optional storage unit, typically used in barracks or tent situations by soldiers. It became available in [YE 32](#).

Purpose

The [Star Army](#) footlocker provides soldiers with a secure-able storage unit for their personal gear when in barracks or tents.

General

Organization Using This item: [Star Army of Yamatai](#) Type: Storage Nomenclature: Ke-G3-1a Designers: [Ketsurui Zaibatsu](#) Research and Development teams Manufacturers: [Ketsurui Zaibatsu](#), [Star Army of Yamatai](#) Entered service: [YE 32](#) Price: 500 [KS](#)

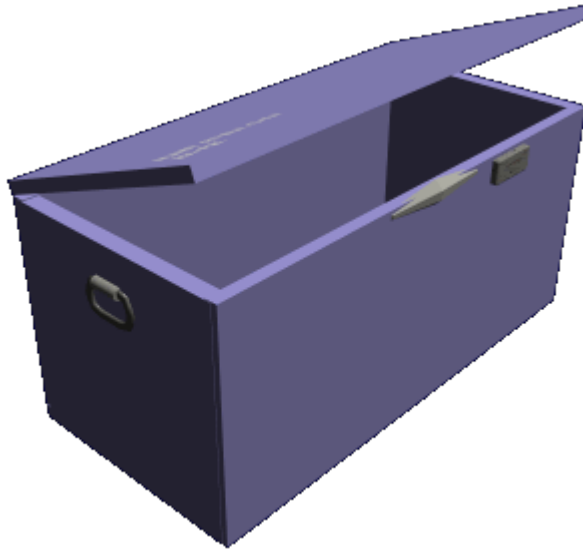

Damage Capacity

See [Damage Rating \(Version 3\)](#) for an explanation of the damage system.

- Exterior: 3 PS Personnel

Appearance

The footlocker is a rectangular box with handles on each end for carrying. A control panel located on the front controls the security of the locker. It sits on four small pads. They come in Star Army Blue, olive drab or camouflage (Previously made in [Multi-net](#) but now made with [RIKUPAT](#) since [YE 37](#)).

Dimensions

- Length: .91 meters (36 inches)
- Height: .45 meters (18 inches)
- Width: .45 meters (18 inches)

Features

- Rugged Construction
- 2 Removable shelves (17 inches x 15 inches) ec
- Biometric security system
- Anchor system
- Handles for carrying

Construction

The footlocker is made from a thin [Durandium Alloy](#) frame and covered in thin sheets. Brackets are fitted approximately 3 inches in the locker to support the shelves. The exterior of the locker is .5 inches which reduces the inner dimensions by 1 one inch on each dimension.

Biometric Security System

The footlocker is secured with a biometric security system. The user can choose between using the integrated thumbprint reader, a keypad entered combination, or both. the control pad has a cover which prevents damage to the panel.

Powered by a [Ke-G1-P3100 - Power cell](#) that can operate the system for two months before needing recharge.

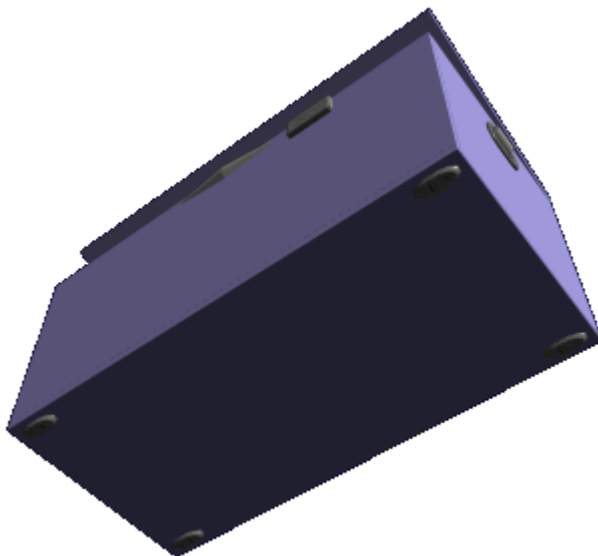

Thumbprint reader not only scans the thumbprint, but also performs a thermal scan which requires the thumb to be still attached to the person.

[Star Army Military Police](#) officers have the ability to override the security system, provided they have probable cause or a warrant.

Anchor System

This system secures the locker to a floor. Built into the base are four small pads that secrete [molecule solution](#). It is controlled by the Biometric Security System. Each pad is also capable of releasing the bond.

OOC Notes

Authored by [Nashoba](#) and approved by [Wes](#) on Dec 31, 2009¹⁾
