- Hanadi's Theme: [Ain't No Rest For the Wicked - Cage the Elephant](#)

## Hanadi Istislah in Roleplay

Hanadi Istislah is a NPC played by [Soresu](#) and is currently involved in the Land of Dreamers plot.

## Physical Characteristics

Height: 6'2" (188cm) Mass: 152 lbs (68 kg) Measurements: 34-24-36 (86-60-91cm) Bra Size: C

**Build and Skin Color:** Hanadi likes to keep herself physically fit to better do her job. Her build is not overly muscular, but sleek muscle tone can be seen if you look closely. Her skin tone which was naturally closer to a flesh tone but has become darker due to exposure to the sun due to her work outdoors.

**Facial Features and Eye Color:** Sharp an angular but with a hint of a soft countenance about her face to break up the somewhat hawkish features. Her cheekbones are high, lips pale, her complexion is clear and smooth with sun darkened skin. Giving a clue that she could indeed be pretty should the tomboy facade be cast aside.

Her blue eyes have a slight almond shape about them that accentuates the natural glow that radiates from within due to the luminescent properties of the Iromakuanhe eye.

**Hair Color and Style:** Her black hair is kept neck length in a bob-cut style that is kept tied back in a very short ponytail due to convenience.

**Distinguishing Features:** Born sickly, Hanadi had been born with a rare genetic disorder of the heart and circulatory system which in the end would result in its failure, [regenerative therapy](#) only served to stall the deterioration. [Lab grown organs](#) were cultured as replacements for it were grown as well as the liver and other major organs as a precautionary measure due to evidence of other major organs following suit. These replacements however allow her to live a normal life as they have taken over those specific organ functions.

Another elective addition on her part were a series of [musculature enhancements](#) that would allow her muscles to work harder, and longer into the days and nights. Meaning her muscles will not tire as easily due to the build up of acids within the muscle chains as well as reducing overall strain and risk of damage due to prolonged use with a slight increase of overall strength.

## Psychological Characteristics

**Personality:** Pragmatic due to her work, Hanadi has the attitude most Curdatl carry when it comes to work, clear cut decisions, a good work ethic determined; insightful and intelligent. She's had to temper herself over the years due to the dangerous environs she has worked in and under difficult even harsh circumstances but keeps an upbeat, positive attitude none the less while doing so. Her jovial nature is slightly more sardonic than most she just doesn't go over the line with it. Friendly, laid back, and down to earth in her down time she enjoys the simple pleasures in life, but also has an eye for the finer things should the opportunity present itself (she just refrains from overindulgence). That is to say she does not see what pomp and fluff can do to a person, knowing full well too much of a good thing can lead to a big head, ego and a jaded sense of self.

**Likes:** Mazerinii Mead, Reiz Chips, Herdtitan Steaks, Relics, Adventurous Experiences, Danger, Exercise, A nice warm bed **Dislikes:** Danger, Cold Weather, Some Reptilian Species, Combat **Goals:** Uncover as many secrets of her people's heritage as possible and to share them, and to delve into the mysteries of the Makuori.

## History

### Family (or Creators)

Jamis Istislah (Father) 93, Harah Istislah 89, Older 3 Sisters, Older 2 Brothers.

### Pre-RP

Born AE 906 in the sprawling metropolis of Lahru, Hanadi was the youngest of six children, the baby as it were. Her parents were some of the wealthier of the Hlarians due to their work with Altjira and Solan, moving their brood to the HAS Aotearoa air ship when she was around four. Growing up in finery and fluff, with the best there was to be had, Hanadi wanted for naught. Or so it seemed. By the time she was twelve, Hanadi had developed a rebellious, adventurous streak in her that appalled her parents. Days at a time she'd stay away, diving off the coasts of the Bismarck Islands, stepping foot into the Whaizat Jungles, and side stepping the Saea Wakir to plumb the mysteries of the Lap Inkka and Lap Laputa ruins, the latter being off limits as per the Vanguard's mandate, the Ivuori research teams, and the ever stalwart Saea Wakir. Both of which were illegal, something that while wrong, felt right to her since to her it seemed unfair to block them off from the public.

It became such a problem that her parents tried many different methods to quell their daughter, even

marriage. Albeit, she had other ideas, instead she gathered what belongings she could carry; purchased the first ticket off-world she could and left them behind. With an independent spirit and thirst for the unknown it was only a matter of time after all. So it was, that by the time she was eighteen she'd left the nest to go out into the wider world and uncover the lost secrets of the Saal, and even attempt to unravel the mysteries of the ancient Makuori.

## Skills

### Survival

Due to her work, Hanadi has become extremely well adapted to surviving on her own in the outdoors. She can hunt, navigate, and find signs of possible water sources with relative ease. Shelter construction and camouflaging it are a simple task that requires naught but common sense. In a bind, she is adept at signaling for aid should a passerby be flying over head, or on the ground.

### Fighting

Over the years, she has picked up a few trade skills having studied with various teachers in the [traditional Saali and Iromakuanhe martial arts](#). She prefers the Saali variants for their flowing movements and some of the more practical forms. She tends to favor a simple pistol having a fairly good grasp of marksmanship of it having passed qualifications with it at 25 meters. Rifles she is adept with on sheer principal but not as deft a hand at them then a pistol considering them more unwieldy as a result her skill with it tend to lag behind.

### Knowledge

Already possessing a good memory, Hanadi enhances it with simple memory retention techniques and games to give the overall effect of that of an Eidetic memory when it comes to certain subject matter. Examples being: History, Legends, Reference Material being chief.

### Communications

Hanadi is capable of using all standard communications found in the [Iromakuanhe Astral Commonwealth](#). She is fluent in Saalsari and Haidasari, and can speak, read and write them correctly including the root languages from whence the standard Iromakuanhe tongues have originated from.

### Medical

The character is capable of basic medical techniques, including everything up to first aid, emergency

care such as CPR or the Heimlich maneuver and the administering of preprepared medicine, such as painkillers or stimulants.

## Rogue

In times of need, a nimble hand is required when dealing with traps and the like including locks. Hanadi has honed her skill in these areas to better bypass possible obstacles without the need for less then subtle methods.

## Physical

Naturally limber, Hanadi is fairly adept at acrobatics, flips, twists, and other gymnastically inclined tricks if the need arises complimenting her physical abilities in other areas if used properly.

## Inventory

### Clothing
