Physical Description

Kaliah is an 8 ft tall Plant-based species that is humanoid in shape with a very pale green skin tone. She has an hourglass figure with hardened dark green scale-like leaves on her forearms, back of her hands, lower legs and feet.

The parts of Kaliah's body that aren't covered by the Hardened leaves are mushroom-like in feel and look, with her head having no nose, quite large round Lilac eyes with eyelids that can see Kaliah's surrounds quite well, not as well as her mammal counterparts but still enough to function normally. Kaliah has a small thin mouth with no lips or teeth, Kaliah's species feeds off energy her body creates in photosynthesis. The mouth was formed for easier communication, but she can use it as a way to eat nutrients for energy if there is no sunlight.

Kaliah's hair is a mass of tangled vines that form hip length hair, the vines can be controlled but are not strong enough to grip or use things. Her hair can change into many styles but she normally keeps it in a ponytail to keep it all together, Her vines are a deep purple in color which is a large contrast to the rest of her body.

Kaliah's hand have two fingers and a thumb all ending with a claw-like thorn akin to nail on a human, her feet have separated toes all with the same claw-like thorns.

Kaliah smells of a meadow as during certain times flowers can form in her hair, this normally happens for one month of the year, for Kaliah the flowers are a pale pink color and smell like honey.

Kaliah weighs 100 lbs and has the measurements of 35B-22-36.

Personality

When off-duty Kaliah is bubbly and sweet to people, always wanting to make sure her crew is having a good time and enjoying themselves while they are traveling and relaxing planet-side. When on-duty her personality shifts to be more focused and determined but will still put the safety of her crew over the mission if needed.

Kaliah is motivated by life itself, seeing all the random and interesting creatures that have been created by environments and other means is why she keeps on going, as they all should be able to roam free and happy. Her goals in life it to do just that and make sure that all species get a chance at survival.

Kaliah is a brave individual that is hard working and doesn't get angry often, but when she does, it doesn't last long before she is happy again. Kaliah sometimes plays with her hair or sings while bored, not really paying attention to what she is doing.

In the 14 years, she has had the planet open for all, she has learned how to socialize with other species and tries to make everyone feel at home and happy. She likes most people unless they are horrible to others or animals and then she gets angry with them.

She hasn't had any relationships with her own species, but she has had working relationships with other species that have taken up to work on her conservation planet and treats others with respect and honor.

History

Kaliah Edonica was born in YE 10.

Kaliah was born on Kallaris a lovely planet that has multiple biomes that all have worked to make a perfect environment for all, growing up in a small family, she was happy and made a few friends throughout her young years. When she was 10 she started her advance studies with her friends, she went for Bio-engineering as biology interested her, terraforming and helping animals get used to new environments were some of her favourite lessons.

When Kaliah became 16 she went out into a jungle on her homeworld and while she was gone, ships had come down and stole the rest of her species, for reasons Kaliah still doesn't know, but she hopes she will find them at some point.

After this event, Kaliah worked on the main city of the world and put out calls for people to come and help, she opened the planet for all to come and enjoy the splendors of Kallaris. People came and Kaliah smiled as her world became vibrant again as she worked hard to offer people jobs and trade with other species and empires.

Kaliah worked for 14 years to make Kallaris a conservationists dream, with the main city being used as a school for younger children to learn about animals and the need for all the species of the world. There were tours for the planets, restaurants, cafes, and shops for everyone who visits the planets.

Now she has gained enough for a ship, so she can travel with a crew and explore the universe, saving others and having fun with all.
