## Physical Description

Green eyes look out from her chalk-white and slender face, which often holds her expression vividly for an instant before it turns back to a twisted up grimace of sorts. She has grey hair that catches the light and is almost as pale as her skin. She speas in low decibals in a sing-songy voice hat carries to only the ears closest, unless she is sparring or under duress, in which case she is as loud as can be.

## Personality

Slow to warm describes her well, as she holds many secrets behind her green eyes. She doesn't like meeting new people and sticks close to those she knows. Her habits are predominantly habitual, such as tucking her hair behind her horn, putting on her lab coat left arm before the right, pushing the pipettes around to form even numbers, and the like.

## History

### Skills Learned

Naha Hoshen has the following notable skills:

- **Chemistry:** Naha has studied chemistry and understands not just the basics, but the finer points to the science. She strives to grasp more of the knowledge of the properties and changes of matter.
- **Somatic Tuning:** Naha has come to believe that genetic modifications are the way in which an Iromakuanhe can reach new heights and studied it voraciously, coming to understand it to the utmost degrees.
- **Symbiotics:** This Ivurori finds joy in splicing living organsims together to find a new way of living. It would be giving her little credit to say it is something she comprehends. Rather, it is something she lives and breathes outside of inorganic chemistry.
- **Communications:** She can use [OGNEIR.net Commonwealth Communications Grid](#), [Solanii "IroCom" Personal Computer](#), and [Solanii Datarod](#) to communicate with the rest of the Commonwealth.
