History

Family (or Creators)

- Jui'case He'uiasye - Father - CEO of [Shukara Armaments and Manufacturing](#)
- Viz'lieun'varya He'uiasye - Older Sister - COO of [Shukara Armaments and Manufacturing](#) and CEO of [Vi'cana Pharmaceuticals](#)
- Seim'iri He'uiasye - Mother (Deceased) - Died upon a foreign planet on a discovery mission, was a scientist.

Pre-RP

Reim'nor'gal, or Rei for short, was born in the [Jui'varen System](#) on a research vessel that her mother and older sister was on. Her mother was researching agricultural improvements that they could make when she went into Labor. Her fellow doctors and scientists helped her give birth to Rei. Rei spent most of her time on research vessels being home-schooled by her mother and their fellow scientists. Upon coming of age she entered the [Youth Corps](#) where her talents would truly shine.

A surprisingly strong and able child, she quickly out-shown everyone who she was placed against taking top marks in almost every training simulation. She was shown to have exceptional judgment and got along with everyone as a result easily being made a captain within the Youth Corp after being promoted from the Youth Corp's Bootcamp. For several years she developed a knack for being known as the go-to girl for hard missions, she lead her unit through even the most impossible odds being known as Dekazo¹⁾ within her twilight years.

During her last year in the youth corps everything went wrong however, higher ups sent her and her unit on a mission off world to check up on a rundown base located in the [No'menshan System](#). Little did they know upon arriving they'd be jumped by rebels who took arms up at the base. Her entire squad was killed in the ambush with her, and a handful of others from her unit getting out alive. Over the course of the next few days they fought with the rebels, more and more of her unit dying before they were able to kill off the last of the rebels. With only her and one other female Laibe Kit left, she radioed in an evac. Before she could get out of the building however, she was jumped by one survivor and cut across the right eye with a contaminated knife rendering her blind in one eyes.

After that, Rei was no longer as gungho to go into violence as she was before. She graduated from the Youth Corp to a position in the [Shukara Volunteer Navy](#). There she was granted an elevated position of [X'Muyeia](#), however she didn't join the marines she went in and became a [Neshaten Healer](#) instead. It was around this time that her successful history allowed her to attract the attention of [Or'ion](#) who desired for her to join their ranks. She accepted on the condition that she could join Section Two, which was a sector dedicated research and development. For the next several years until the age of 19 she worked on raising her status in Or'ion and the Shukara Volunteer Navy, working out a new history for her so her bloodthirsty Dezako days would burn away in the annuls of history.

Currently she has reached a point where she is a Uicron Level Clearance member of Or'ion, and a [F'Bantau](#) in the Shukara Volunteer Navy. Her new assignment? A new ship that she had never seen, but heard plenty about...

Biology

During her youth, and her Youth Corp years, Rei was taught Biology by her mother and self-taught herself even further than that. Mastering the Anatomy of the three major Neshaten races.
