History

PRE RP

³⁾ Alexia was born two years after her brother [Icarus](#) and like him lived through the [Second](#), [Third](#) and [Fourth](#) Elysian Wars with [Yamatai](#) without their father being with them. As she had no father for her childhood Alexia looked to her older brother for support and would often follow him around and was always interested in what he was doing.

Alexia had been the favorite child of their mother being the daughter she had always wanted and had been cared for far more than her brother, ultimately leading to her far brighter personality as opposed to her brother's cold presence and hard personality from the lack of his father. Growing up she was taught many "lady-like" practices by her mother, as she grew more critical Alexia incorporated these skills into her list of talents seeing them as potential means for gain. While [Icarus](#) joined the Star Army in [YE 30](#), Alexia stayed with their mother and helped her tend to the house and its routine chores and upkeep while practicing her assorted techniques on strangers to pick up useful bits of information that she came to find very useful in bribing and blackmailing for small favors.

Alexia was still living with her mother during the times of the [Battle of Elysia](#) and [Second Mishhuvurthyar War](#) and as a result was evacuated as a precaution during the attacks in [Elysian](#) space, the two conflicts jump started her plan to enlist in the [Star Army of Yamatai](#) giving her the push she needed to begin her training.

She enlisted in the [Star Army of Yamatai](#), after going through the [Caelisolan](#) project like her brother to get a better body to help her in the field, in [YE 35](#) and completed her basic military training, she was stationed at the Blacksands Military base under her brother's command for three years. After serving for several years she attended officer school at [Ketsurui Academy](#) and was trained up as a [Star Army Starship Operator](#) with a focus on starship piloting. In [YE 45](#) Alexia was assigned to the [ecs_panopteles](#).
