

# Candon Howard Suites

Candon Howard Suites is a [player character](#) played by [Rizzo](#).

Candon Howard Suites	
	
Species:	<a href="#">Minkan</a> (intentionally made to appear Nepleslian)
Gender:	Male
DoB:	YE 23
Height:	5'7"
Weight:	200lbs
Organization:	<a href="#">Star Army of Yamatai</a>
Occupation:	Intelligence Specialist
Rank:	<div> <a href="#">Ittô Heisho</a></div>
Current Placement:	<a href="#">Planet Himiko</a>

## Physical Characteristics

- Height: 5'7"
- Mass: 200lbs

**Build and Skin Color:** Caucasian lean muscle

**Eyes and Facial Features:** Light bluish gray eyes

**Ears:** Human

**Hair Color and Style:** Short and black, typically styled

**Distinguishing Features:** Striking eyes and can be very loud

## Psychological Characteristics

**Personality:** From living as a soldier and cop Candon has aquired the discipline one would expect from a military as well as decent people skills. While he'd prefer to keep his words brief and to the point he still understands the importance of saying his words in a manner that won't offend others. Due to the recent tragedies in his family he has closed up much of his social life, no longer desiring to build friendships. However, he still values the life of his teammates and will do things to help them when appropriate. He is reserved and industrious, one who generally only speak when spoken to though he can carry a nice conversation. His mind is very practical, a trait that can help him solve problems with somewhat simple solutions. In combat he is very independent, typically relying only on himself to fight the battle. Before combat he tends to be impatient, a trait he's tried to overcome by just being quiet and getting ready. He may check his weapons several times in the process.

- **Likes:** high caliber/energy weapons, martial arts, mechanical systems, violent justice, driving fast
- **Dislikes:** Ignorance, alcoholics, solid ground, Yuletide
- **Goals:** Build a new life

## Pre-RP

From birth Candon was an anomaly, one of the very rare male NH-17s. He was the result of a soldier being assigned the task of guarding a small space based PNUgen research facility. Sana fell in love with a lab tech named Howard Davis Suites. They promised that they would be together after her military service was through and allowed herself to have a child(an action some believed to be a glitch in her OS). Being born as an NH-12 he developed quickly and became an adept soldier, though most of his assignments involved guarding military interests and escorting VIPs, an easy task until the First Mishhuvurthyar War began. By this time Sana, who had always worked in teams with her son, had already been retired. Although he was never on the frontlines he was often called upon to run missions that involved securing dangerous areas.

After the first year of the war he retired from the military to be with with his family. His father, Howard Davis Suites, was still employed by PNUgen until their closing in YE 27. In YE 30 the family was employed by Origin. His mother, Sana Suites, worked as a Security Officer wherever Howard was stationed. Candon and Sana began working as a team again as police, enforcing policies on the company owned space stations with the research facility Howard worked at. In a sense they were working as a family. During the first year of working for Origin Sana and Candon were both added to a SWAT team. Candon, like most

military trained people, proves to be a very proficient marksman, though he had only used his sniper once while not on the shooting range he received a marksmanship award for hitting a pistol from a drunk assailant's hand with a snapshot. Generally he relied on his pistol whenever things became heated.

In his fourth year of working for Origin Sana was killed in an explosion from the stations liquid O2 lines, an unfortunate accident caused by the negligence of an intoxicated member of the maintenance crew. The fact that Sana could be brought back was the thing that saved the man who was about to lose his head at the dinner table. It took only two days to be recloned. Sadly her last backup was made just before meeting Howard, a time when she was neither a wife nor mother but rather a free spirited, single young woman with no desire to be the former. Howard committed suicide minutes after being served divorce papers.

After a brief time away Candon transferred to Sunrise Station where he uncovered a plot to severely damaged the station. While he stopped a bombing by a group of extremist members of the local construction union he also caused a great deal of collateral damage in the process. To protect him from pending lawsuits Origin gave him severance and quietly moved him off the station and brought him to Yamatai Prime where he discovered that his mother had begun a new family. After another brief bout of depression he decided to join the SAoY.

Basic training was easy for him, seeing as he started life as a soldier. Afterward he specialized in engineering for a position aboard a starship. The training staff found that he had a very adaptable personality, one capable of learning easily. he was offered the chance receive SAINT training, an offer he immediately accepted. After months of the most intense training he'd ever received he graduated as an operative. Seeing a need for a SAINT presance aboard Eucharis his dossier was sent to Hanako Shôshô by [Nakaide Shida](#) himself.

## Skills

### Communications

Suites is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. He is fluent in Trade (language), Yamataigo (邪馬台語), and Nepleslian. He can speak and write each language correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.

### Combat

Suites received extensive hand-to-hand combat training, followed up with a rigorous training program. The [Minkan](#) trains with [Nekovalkyrja](#) and is no stranger to fighting significantly stronger opponents. He prefers keeping a quiet entry when running a military operations and is proficient in silent takedowns of both lethal and less-lethal means and can disarm an opponent in ways that usually prevent weapon fire. Suites has been trained in military strategy and can organize tactics including direct action combat,

sabotage, reconnaissance, covert infiltration and exfiltration, surveillance, and simple area denial. He is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons and has a good practice of SERE(Survival, Escape, Resistance, and Evasion). Weapons he is trained in include energy and ballistic pistols, knives, automatic rifles, sniper rifles, and powered armor. He has also received training in Yamataian sword arts.

Aside from his extensive training, he has first-hand experience in countless real world combat scenarios. His ability to kill is as natural to him as breathing with his reflexes, precision, and cunning being exceptional even when compared to the finest super soldiers.

## **Technology Operation**

As a SAINT Operative with training as a starship engineer Suites has received extensive training in the operating and repair of the various mechanical, electrical, and software based systems found on starships, power armor, and general vehicles. Due to the nature of his role he has been trained to repair weapons on the field has gained enough firsthand experience to accomplish most repairs reliably provided he has access to the proper tools. He is extremely proficient in encryption and decryption of data as well as using surveillance systems and strategic analysis systems for operational planning. Suites is also capable of operating and repairing surveillance equipment and AI electronics, though hacking an AI always proves difficult.

## **Mathematics**

Suites received basic mathematics training, to including up to algebra and trigonometry. His added burden of managing the economy of the USO has taught him many lessons in economic theory while the political act of staging an orbital collision with a flight plan filed weeks in advance has proved a savvy for trigonometry when it comes to political applications.

## **Rogue**

Having completed SAINT training Suites has learned how to be stealthy and was taught to be extremely aware of his surroundings. He is good at hiding and acquiring various items and sensitive information. Suites can create a false identity or even impersonate another person in the field, though the persona of many aliases he's created do not differ much(think James Bond style, hes not really in character when he's just trying to blend in or scout an urban area. He just relaxes and acts like himself). When it comes time to forcibly extract information from an unwilling host he used to get a bit overboard. Sometimes cutting off fingers, using electricity, or simply applying brute force. Over time his conscience has finally begun to change and he will generally do his best to use psychology, law, or his presence to persuade an unwilling subject.

## **Physical**

During his initial military service Candon's favorite drills were obstacle course runs(no flight). He eventually began finding quicker ways to overcome the obstacles and adopted a style that loosely resembles Parkour.

## Repair and Maintenance

Suites is trained in the various mechanical and electronic systems found on a space ship/station as well as the vehicles commonly found on such vessels. He is capable and qualified to repair and maintain ships, armor, vehicles, and weapons.
