Psychological Characteristics

- **Personality:** Dagsuz is a friendly fellow, though somewhat aloof when first encountering someone. He chooses his close friends very carefully and sparingly, but is loyal to them fiercely. He is, despite his friendly manner, quite distrustful of others and has little faith in the decisions of others. He is not arrogant enough, however, to try to usurp his commanding officer. He respects most everyone, though he may wholly disagree with them. He often works himself to exhaustion under stressful situations, neglecting the needs of his body in favor of repairs. He is only able to accomplish this because of his mastery of the biological 'autopilot', which he puts to use rather often. His short term memory sometimes fails him in this state.
- **Likes:** Rare cooked red meats, small sweet cakes, fruit juices, watching others go about their day, Creating things.
- **Dislikes:** Heavy humidity, loud telepaths, things he cannot do, being told he cannot do something he knows he is capable of, dark matter.
- **Goals:** To serve, protect, discover and create

History

Dagsuz has, as far as anyone is concerned, no notable past before his transference to a Yamataian-type body (late YE 28). He never discusses it because it never comes up. He began his training, etc, directly after the body transference to become an engineer and technician for the [Star Army of Yamatai](#), and was assigned to the [YSS Sakura](#) fresh from his training. Here, he served as a technician through the demise of the ship, without permission and likely illegally crafting technologies out of spare parts. Most notable were the psionic grenade and his now-banned work on projected force techniques. He continued on with the same crew aboard the [YSS Plumeria](#), unfortunately not surviving the ship's demise. His close involvement with [Nanimo, Rei](#) over a few missions and much of his offtime was rather brutally cut off at her death aboard the YSS Plumeria due to the absence of a recent soul transfer backup, and he is still debating whether or not he should make himself known should Rei ever be revived. Dagsuz was assigned to the [YSS Asamoya](#) for a time, but is now technically AWOL.

Skills:

- **Maintenance and Repair:** In order to facilitate his duties as a technical sentry, Dagsuz received extensive training in the maintenance and repair of Star Army shuttles, power armors, and starships. He is adequately proficient at doing maintenance and repair work on any ship model as a part of a team, and at repairing a shuttle or a power armor with the proper tools. Dagsuz is also somewhat proficient with the maintenance and repair of Star Army ground vehicles.
- **Communication:** Dagsuz is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. He is fluent in English and Japanese. He can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc. Dagsuz is also capable of encrypted telepathic communication.

- **Fighting:** Dagsuz received hand-to-hand combat and ranged combat training. He is skilled in combat, both in Yamatai-like conditions and in zero gravity, with and without weapons. Weapons he is trained in include energy pistols, energy rifles, grenades, knives, and power armor.
- **Technology Operation:** Dagsuz is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships. He is proficient in entering and/or searching for information.
- **Mathematics:** Dagsuz received basic mathematics training, to including up to algebra and trigonometry, and displays a special affinity for raw number usage.
- **Engineering:** Dagsuz is extensively trained as a mechanical engineer, and has spent his free time expanding his engineering knowledge on the more controversial fronts. He has a special affinity for creating things from spare parts, and often does so compulsively.
- **Survival and Military:** Dagsuz received thorough survival training as a part of his overall course. He is sufficiently adept at Finding water, land navigation with and without directional implements, shelter construction, hunting, signaling, and camouflage. Special attention was paid to survival techniques that assumed very little or no workable materials.

Current KS balance:1800 Current possessions (outside of the Standard Issue [SI] items): None

Unique Systems

- **Psionic Effect Driver/Controller (PEDC)** (as PSC, with amplification capabilities) (*Design:100%*) (*build:0%*) (ready to be built)
- **Spatial Deviancy Drive (SDD)** (Defensive teleportation system) (*Design:10%*) (*build:0%*) (in developement, pending deconstruction and analysis of Teleportation pack)
- **Omnidirectional Aether Projection System (ODAPS)** (*Design:45%*) (*build:0%*)(in developement) : (4 second firing time for maximum of 4 targets, targeting time of 4 independant targets is 10 seconds. Cooldown time of 20 seconds after full discharge of 2 second sustained aether beam to 4 targets.)
- **Enhanced Aetheric Generator and Capacitor system** (*Design:100%*) (*build:0%*) (Ready to be built)
- **Gravatic Extrusion Driver (GED)** (*Design:72%*) (*build:0%*) (in developement)
- **Cibo AI Suite** (*Design:5%*) (*build:0%*) (To be planned)
