Physical Characteristics

Build and Skin Color: Akihiro is an androgynous male Neko who has a slim build. His body is quite feminine compared to male Geshrin, or Minkan counterparts. He has muscle, but it is surrounded by the softness of a females skin. His skin color is light blue. He stands at roughly 5'7" tall and weighs in roughly 130lbs.

Eyes and Facial Features: Like a typical Neko, Akihiro has almond shaped eyes that is typical amongst the Japanese like heritage that Yamatai has. His facial features are quite smooth, and feminine much like his body, his nose is slightly pointed outwards and curved ever so slightly to point down at the tip, and his lips are slightly puffy and feminine as well.

Ears: Akihiro has cat ears like every other Neko, his ears are furred and the tips of the ears droop downwards lightly. The fur on the ears are a light brown to go with his natural hair color.

Distinguishing Features: As stated under facial features, his face is rather feminine and the only thing that gives away that he would be male is his flat chest.

Psychological Characteristics

Personality: Akihiro is a shy, not very outgoing Nekovalkyrja. He doesn't really talk much about anything, but when the topic of science comes up he could talk your ear off. Despite his shyness he is very passionate about his job in the military sciences. He is exceptionally shy and off put by the presence of female Nekovalkyrja due to the fact that he is a male, and that is greatly frowned upon in Yamatai for a Neko. He is still very dutiful and exceptionally loyal to the Star Army and the Yamatai Government. He also tends to crossdress, and enjoy cross dressing at times.

- **Likes:** The Star Army, Serving Yamatai, The people of Yamatai, Neko's, reading, and training, Cross Dressing.
- **Dislikes:** Being Judged for being a Male, letting people down.
- **Goals:** To prove he wasn't a mistake.

Pre-RP

Akihiro was born as a Geshrin to Ino and Sakushi Hirabayashi in YE 9. Akihiro was always an odd sort, and he was always rather feminine in his mannerisms. He took a severe interest in Biology and the Sciences at a young age and began studying it around the age of 10. Over the years he continued his studies and began getting more and more interested in what the schooling had to offer, by the age of sixteen he was more than happy to apply for a scholarship to the university. By the age of 17 he was already accepted into the college that he had applied for.

It was around this time when his father Sakushi came down with an illness that took his life relatively quickly. This came as a shock to Akihiro, and it caused him to begin to decline in his studies, to the point where the university kicked him out for lack of academic success. Lost, and having no idea where to go, he decided to join the [Star Army of Yamatai](#) in YE30. He joined the SSS in YE33, and began development on a new type of Neko, specifically a male version of the [Nekovalkyrja, Type 33](#). Eventually he developed a body and was rather proud of himself.

In YE36 he petitioned for his consciousness to be put into the male neko's body. His reasoning was not very clear, but for a long time he had desired to have a body that could be considered exceptionally strong when military grade, plus the Anti-Gravity was a bonus he desired. His petition got approval with slight discontent for what might become of him. So without delay he transferred himself into the male Neko body. Having the body, he decided it was time for him to explore and begin his life outside of the home of Yamatai, and applied for a position aboard a star ship. It was during this time that he began hearing how his decision was a mistake, he would prove to them that it wasn't a mistake, that he wasn't a mistake... He would prove to them that he could be as good as any female Nekovalkyrja!

Skills

Communication

Having been in the Star Army, and on Yamatai, for many years Akihiro is very much capable of fluently speaking and writing in Trade (Common) and Yamatai-go. He has also dabbled in Seraphim for communication with the Elysians, as well as dabbled into the language of Lor (However he is far from even nearly fluent in the Lorath Language)

Fighting

As per regulation, Akihiro was put through bootcamp and taught how to fight in combat should he ever have to. He has become very efficient in hand-to-hand combat, as well as power armor piloting, and specializes in Assault based weaponry, and energy weapons.

Technology Operations

Once more, per regulation, Akihiro was trained to handle computer systems on the ships and in Yamatai that use the Kessaku OS. He is very proficient in entering and searching for the information on said systems as well as programming them.

Mathematics

Akihiro was trained to be a wiz in Mathematics, as part of his science and chemistry academics. He is able to go up to the point of Quantum Theory in terms of mathematics. This means he is fluent in Algebra, Calculus, Trigonometry and everything in-between.

Science

Akihiro has studied the sciences for a majority of his life, his love for the unknown and explaining the unknown goes beyond that of any normal Geshrin, Minkan, and Neko. Since he started studying it at the age of ten, his knowledge in the arts of science has only expanded and keeps expanding. He is a jack of all trades when it comes to science, and his knowledge in the arts is only matched by the passion he has for the arts of science.

Biology

One of the specialties he has under his scientific belt. He is exceptionally learned when it comes to Biology. He has studied quite a good bit of Xenobiology and the biology of his fellow Yamataians and Neko's. He is capable of also identifying habitats, and animal behavioral patterns, as well as different known fauna.

Chemistry

The other specialty under his scientific belt. He is exceptionally learned in chemicals and the art of mixing said chemicals into known chemical mixtures that can be used for different things. Furthermore, he knows the chemical and biological patterns of the Neko Body, and the knows how to successfully terraform a planet by theory, though never has actually done so.
