History and Relationship Notes

Yuki Asunana was born on Yamatai in [YE 13](#) to a combination of a military and political family, her mother was a politician while her father was a soldier. She was mostly schooled privately by either her mother or by a tutor and rarely attended a public school, although this changed in her teenage years when her mother sent her to a private boarding school to get a bit of a social life.

Attending a boarding school wasn't something Yuki wanted to do, but it turned out to be a great idea as she became a class president and then later joined the school's student council where her mother's political side showed through on her. She graduated a few years later with high marks and entered into the political arena beside her mother as an aid, but later on, she went on to work with other people to help expand her knowledge.

Just before her twenty-second birthday she went to [Anisa System](#) to continue her pursuit to help the planet, this occurred a short while before the Battle of Yamatai. She wasn't on planet when new farms were being added to help deal with the sudden food crisis, but returned in the middle of [YE 34](#) to help speed up the process.
