

Gravity Reactive Plastic Explosive

Emrys Industries

A Tamahagane Company

The Emrys Industries Gravity Reactive Plastic Explosive or GRPE was developed for unique. It was first used in the cable for the [Ge-P2-1a - Suribashi-Class Space Elevator](#) in [YE 33](#).

About GRPE

GRPE looks similar to the most plastic explosives like [T31PE](#). However it is a two part explosive that when detonated the force is directed relative to the force of gravity. By aligning the explosive layers parallel to the plane of gravity causes the force to explode perpendicular to the force of gravity. If aligned perpendicular to the plane of gravity, the explosive force is directed along the force of gravity. This makes GRPE an excellent product for cutting stone, or large pieces of metal precisely. It has also been used for felling large trees by causing it to detonate at 1 meter above the ground.

GRPE is very stable and insensitive to most physical shocks. Detonation can only be initiated by a combination of extreme heat and a shock wave, such as an inserted detonator firing.

Specifications

Details

Manufacturer: [Emrys Industries](#) **Organizations Using This Product:** [Tamahagane Corporation](#) Type: Demolition Class: Explosive Designer: [Tamahagane Corporation R&D](#) **Prices:** 25 [KS](#) 1 block, 1,200 [KS](#) for 1 case

A block of GRPE weighs .75kg (1.6 pounds). A case weighs 37.5kg and contains 50 blocks.

Quantity	Damage
1/3 block	3 Personnel scale
1/2 block	4 Personnel scale
1 block	1 Armor scale
2 blocks	2 Armor scale
4 blocks	3 Armor scale
8 blocks	4 Armor scale

GRPE can be detonated with the following types of detonating devices, or their Emrys Industries equivalent.

- GRPE-DC or [Type 31 Detonating cord \(T31DC\)](#)
- GRPE-RD or [Type 31 Remote Detonator \(T31RD\)](#)
- GRPE-DD or [Type 31 Delayed Detonator \(T31DD\)](#)

OOC Notes

Authored by [Nashoba](#) Nov 25, 2011 Submission Approved by [Wes](#) on November 25, 2011. [Forum Thread](#).
