

Galactic Horizon Mini Missile

The Mini Missile designed by [Galactic Horizon](#) in [YE 40](#) is a small ordinance designed to be useable by multiple launcher systems to save on development costs in the future. Using small size and rapid combustion the missile can move at supersonic speeds within an atmosphere and travel just as easily in a vacuum.

AP Configuration: Unlike conventional propelled explosives the payload is located below the tip and does not explode upon impact, instead the point has a solid tip to punch through armour. Once the hull has been breached by the point the payload detonates.

HE Configuration: Standard missile configuration with the payload near the point of the shell, upon impact the payload will detonate with directional force towards the surface it collided with.

Stats

- Damage Rating: Tier 6
- Size: 30cm length, 10cm diameter
- Damage Description: AP or HE explosive payload
- Effective Range: 100m-800m within atmosphere
- Muzzle Velocity: Mach 1
- Muzzle Blast: None
- Recoil: Easily accountable by space craft
- Energy Source: Combustion
- Pricing: 800 [KS](#) per AP, 500 [KS](#) per HE
