

Ge-Y1-E3104 - Automatic Fire Suppression System

Ge-Y1-E3104 - Automatic Fire Suppression System is installed on [Geshrinari Shipyards](#) vessels built after YE 31.

The AFSS is available in all parts of the ship. When activated it deploys a fire suppressing gas. This gas reduces the available oxygen so personnel in an affected area should leave, or don a portable air tank. Each compartment has sensors to detect smoke and or heat. When activated the system triggers a ship-wide alarm over the [Ge-Y1-E3103 - Intercom System](#) giving the location of the fire.

OOC Notes
