

# Test Thought Component - X01L "Linear Limbs"

This is a set of 4 limbs and a head built by [Kage Yaichiro](#) and [Project THOUGHT](#) to test the effectiveness of various limb designs on the [Test Thought Armor - X01 "LAMIA Agura"](#).

These components consist of both sliding groove (to emulate rotation) and single axis joints arranged to mimic that of the humanoid form. The goal of these is to find which joints correctly mimic human form, while attaining maximum strength, speed, and accuracy.

While not a fully effective set on their own, elements of the components found their way into the [Test Thought Component - X01M "Mixed Limbs"](#) variant.
