

Test Thought Component - X01M "Mixed Limbs"

This is a set of 4 limbs and a head built by [Kage Yaichiro](#) and [Project THOUGHT](#) to test the effectiveness of various limb designs on the [Test Thought Armor - X01 "LAMIA Agura"](#).

These components consist of elements taken from the [Test Thought Component - X01L "Linear Limbs"](#) mono-axis joints, the [Test Thought Component - X01R "Rotary Limbs"](#) rotary joints, and the [Test Thought Component - X01D "Doll Limbs"](#) ball and socket joints; arranged to mimic that of the humanoid form. Having painstakingly measured which joints from each type are best for the Thought Armor and making a good mix of ease of use, responsiveness, speed, accuracy, strength, and longevity; the project was finally able to move into the Beta phase with this limb design.
