

Mining Guild Emporium

The Mining Guild Emporium, which is owned by the [Mining Guild](#), was established in [YE 45](#).

About the Mining Guild Emporium

The Mining Guild Emporium is the premier shop owned by the [Mining Guild](#), offering a wide range of products related to mining, technology, gemstones¹⁾, Model Figurines and materials. Located in Commercial Districts of any towns, the Emporium offers a wide range of high-quality products for mining enthusiasts, gemstone collectors, and mining professionals, or just people hoping to collect new model figurines.

Size

50,000 square feet (4,650 m2)

Store's appearance

The Store differs from most [New Dusk Conclave](#), and [Yamatai Star Empire](#) architectures, as it was made from some special materials.

Color Scheme

The interior and exterior color schemes of The Mining Guild Emporium are consistent with a predetermined palette. The building materials allow for **warm earthy colors** like browns, oranges, and yellows on the inside, which give the store a cozy and grounded ambiance. Of course, the majority of the stones, or at least those at the entrance and exterior, are **industrial gray tones**, which go well with other accent colors that are symbolic of the Mining Guild. In certain spots, there were splotches of blue and green, particularly when signs and exhibits included model miniatures.

Construction

The Mining Guild Emporium is an establishment constructed using a combination of refined materials, processed minerals, and fabricated stones that the skilled miners of the Mining Guild have meticulously sourced and crafted. This innovative approach gives the Emporium a distinct and captivating appearance both inside and out.

History

Nyx Pine, the daughter of the late Archduke [Jack Pine](#), held the esteemed position of the [Royal Representative](#) of the [Mining Guild](#). As a prominent figure within the guild, Nyx played a critical role in shaping its future. In [YE 45](#) and recognizing the need for expansion and diversification, Nyx sought a meeting with [Astrid Kurosaki](#), the CEO of the Mining Guild, and Astrid's twin sister, [Aeta](#), the COO. The meeting took place at the Mining Guild's headquarters, a towering structure known for its magnificent blend of refined materials obtained through the guild's mining and processing operations.

Nyx began the discussion by expressing her concerns about the Mining Guild's heavy reliance on [Black Wing Enterprises](#) for distribution and sales. She believed that opening the Mining Guild Emporium would allow for greater control over their products and profits. The Emporium would be a showcase of the guild's refined materials, both those dug through and processed and those that had been fabricated using stones, creating a unique and special appearance for its interior and exterior. As Nyx presented her vision for the Mining Guild Emporium, Astrid and Aeta listened attentively. They valued Nyx's expertise and respected her position as the Royal Representative. They too had long considered the idea of reducing their dependence on Black Wing Enterprises and embracing a more independent approach for their business operations.

After a thorough and spirited discussion, Astrid and Aeta agreed to Nyx's proposal. They recognized the potential of the Mining Guild Emporium to not only showcase the guild's refined materials, and their technology, but also to establish a direct connection with their customers. This move would allow the guild to forge stronger relationships and increase their influence in the market, ultimately paving the way for greater success and prosperity. Together, Nyx, Astrid, and Aeta spearheaded the development and construction of the Mining Guild Emporium, a testament to their shared vision and determination. The Emporium would serve as a symbol of the guild's independence, showcasing their unique materials and craftsmanship to a wider audience.

As construction commenced, the Mining Guild began to gradually reduce its reliance on Black Wing Enterprises, transitioning towards their own distribution channels. This strategic shift marked a new era for the guild, solidifying its position as a major player in the mining and refining industry. With the Mining Guild Emporium on the horizon and the support of Nyx, Astrid, and Aeta, the Mining Guild embarked on a journey towards growth, empowerment, and self-sufficiency, leaving behind its previous ties to Black Wing Enterprises and embracing a future full of potential and opportunity.

Exterior

 The exterior of the Mining Guild Emporium showcases the Guild's mastery over extracting and processing minerals into a seamless blend of practicality and artistry. The walls, made of carefully hewn stone and reinforced with high-strength alloys²⁾, give the building a sturdy and imposing presence. However, the walls have an intricate detailing, that allows the building to set itself apart. Embedded within the stone facade are veins of shimmering metals extracted deep from the mines, polished to a brilliant luster, and delicately woven into the structure. These metallic panel accents, ranging from gold and silver to copper and steel, create a captivating mosaic that highlights the Guild's dedication to craftsmanship and attention to detail. It also catches the light and catches the eye of any passerby.

As visitors approach the Emporium, towering columns made from intricately designed fabricated stones greeted them. These stones are created using advanced techniques, combining natural minerals with synthetic materials to achieve remarkable strength and durability. The columns serve as a testament to the Guild's ability to blend traditional mining practices with innovative fabrication technologies. The Entrance ways to the Emporium are pairs of sliding doors, which open immediately on detecting of anyone with weight regardless of sentience, or animal.

Interior

As visitors enter the Mining Guild Emporium, they are immediately immersed in a captivating environment that reflects the Guild's dedication to excellence and their deep connection to the materials they work with. Every aspect of the interior design is carefully curated to showcase the unique qualities of refined ore, metals, and fabricated stone. The interior is adorned with walls and floors crafted from refined minerals, with mosaic patterns created using intricate tilework crafted from a variety of precious and semi-precious gemstones. This is polished to a mirror-like finish. These mineral surfaces reflect light, giving the space a mesmerizing and enchanting glow.

The Emporium's shimmering furnishings and fixtures are carefully chosen to complement the mineral theme. Tables and display stands are masterpieces made from beautifully cut and polished mineral slabs, showcasing the Guild's exquisite craftsmanship. Throughout the Emporium, intricate mineral patterns are seamlessly incorporated into the architectural design. From elegant mineral mosaics on the walls to veins of imported gemstones running through countertops, every detail showcases the Mining Guild's deep understanding and appreciation for the beauty found within the Planet's treasures.

The fixtures and furnishings within the Mining Guild Emporium are not mere afterthoughts but carefully crafted pieces that serve as functional works of art. The walls are adorned with masterfully crafted artwork, sculptures, and ornate metalwork, all showcasing the miners' profound appreciation for the beauty and versatility of the materials they extract and refine. They cleverly designed light fixtures to resemble mining lanterns, adding a touch of nostalgia and paying homage to the Guild's rich history.

Store Layout

Four and a half floors of the Mining Guild Emporium are devoted to various product categories.

Ground Floor

Customers enter the store on the ground level, which is a sizable room with exhibits of different kinds of gemstones, as well as minerals and crystals that aren't made of gemstones. Additionally, it has cabochons of various kind, each neatly arranged, as well as synthetic gemstones and crystals, including brand-new specimens. Customers may choose from a variety of loose gemstones and work with professional gemologists to create custom jewelry designs.

Second floor

They surrounded the second level in the back of the store's gemstone and jewelry area, which is where commodities like refined metals and samples of minerals, including those from space, are kept. The volumetric indicators above the portions will let customers know where this area is.

Third floor

The machinery and technologies used in mining are located on this floor. Customers may browse and buy the newest mining tools here, which also contains a showroom for bigger mining equipment like the Mining Guild's starships and ANT power armor.

Last level of Third Floor

The model figurines can be found in the last level as well as clothing.

Fourth Floor

This level serves as a showcase for some of the store's technologies, including virtual reality mines and other such items.

Visiting Information

Every day from Monday through Saturday, from 9:00 AM to 6:00 PM, the Mining Guild Emporium is open. Customers may browse and buy merchandise online through the Guild's official website or visit the store in person. Please be aware that pricing could change depending on the market and supply. Please get in touch with the Mining Guild Emporium directly or go to their official website for the most recent information.

Products Sold

Our shop offers a wide range of products, specially chosen for mining professionals, gemstone enthusiasts, and collectors.:

1. **Gemstones:** We offer a vast array of gemstones, sourced directly from the Mining Guild's mines. From vibrant rubies and emeralds to rare sapphires and amethysts, our gemstone collection appeals to both aesthetic and investment purposes.
2. **Precious Metals:** Discover a selection of precious metals, including gold, silver, and platinum, refined to the highest purity. These metals can be used for jewelry-making, investment, or industrial applications.

3. **Mineral Specimens:** For collectors and enthusiasts, we offer a range of exquisite mineral specimens, featuring unique formations and impeccable crystalline structures. These specimens showcase the beauty and diversity of the Mining Guild's mineral resources.
4. **Technology:** Upgrade your mining operations with our cutting-edge mining technology. From advanced sensors and scanners to AI-assisted data analysis tools and mining equipment our technology offerings are designed to optimize resource exploration and extraction processes. We provide state-of-the-art drilling rigs, rock breakers, and excavation tools to maximize efficiency and productivity.
5. **Model Figurines** come near the back, where we sell, miniature 1'8th scale figures, from our drones, to our ANT Power Armors and finally finish off with model starships. You can decorate your homes with neat Mining Guild memorabilia to show your fanship.
6. **Experience.** At the back of our store are virtual reality booths where you, the customer can experience life in our Mines and use out technology safely.

Instore Technology

Modern technology is used by The Mining Guild Emporium to improve customer service and highlight the beauty of its goods. The following are a few of the store's important technological features:

Store Employees

- **Inventory Management:** The Emporium utilizes state-of-the-art inventory management systems to efficiently track and organize their extensive product range. This ensures accurate stock levels and minimizes the chances of errors or discrepancies.

Customers

- **Online Store:** The Mining Guild Emporium offers an online store where customers can browse and purchase products from the comfort of their homes. The website features detailed product descriptions, images, and a secure payment gateway for seamless transactions.
- **Holographic Displays:** The store utilizes holographic displays to showcase gemstones, materials, and technology allowing customers to view three-dimensional representations and appreciate their brilliance and intricate details.
- **Interactive Touchscreens:** Interactive touch panels are available throughout the store, providing customers with detailed information about each gemstones, materials, and technology, including its origin, unique properties, and historical significance.
- **Virtual Reality Stations:** Mining Guild Emporium offers virtual reality stations that allow customers to virtually explore a mine, gemstone and ore extraction processes, and even try on virtual jewelry embedded with gemstones.

Ground Floor

 The Mining Guild Emporium's ground level is devoted to displaying a stunning assortment of jewels and

unusual minerals that have been obtained via various mining activities. Customers may look through a range of precious and semi-precious gemstones in this location. They have the option of selecting from a variety of loose gemstones or having them set into individually created jewelry, such as rings, necklaces, and earrings. The cost of specially made jewelry varies according on the complexity of the design, the materials used, and the size and quality of the gemstone. Additionally, there are special manufactured gemstones and other crystals on the floor.

Gemstones Levels

From the doors of the store, to the start of the Gemstone Aisle levels, was a 63 meters in distance. and  in between the aisles were spaced at 12 feet, allowing for even the bigger sized customers to walk in and browse the shop, though a word of caution, neither the store nor the Mining Guild is liable for any injuries sustained due to foolishness.

Name	Description	Price
 Diamonds	³⁾	2,000 - 50,000/per carat
 Rubies	⁴⁾	1000- 15,000ks/per carat
 Sapphires	⁵⁾	500-10,000ks/per carat
 Emeralds	⁶⁾	\$500- 8,000KS/per carat
 Aquamarine	⁷⁾	10 to 100ks/per carat.
 Citrine	⁸⁾	10 to 100ks/per carat.
 Garnets	⁹⁾	10 to 100ks/per carat.
 Topaz	¹⁰⁾	10 to 100/per carat.
 Amethyst	¹¹⁾	10 to \$100/per carat.
 Jade	¹²⁾	20,000KS/per carat.
 Agate	¹³⁾	from 15 to 80ks per piece./per piece.
 Jasper	¹⁴⁾	10-70ks/per piece.
 Onyx	¹⁵⁾	30-100ks/per carat.
 Turquoise	¹⁶⁾	30-150ks/per carat.

Rare Gemstones Level

Behind the main Gemstone area, and up two small steps is the Rare Gemstone Level, where Customers can discover special gems that were supposedly rare in all of their Mining Guild's Mining sites. This level follows the same layout as the gemstones before.

 Blue garnet	¹⁷⁾	1,500KS/carat
 Black Opal	¹⁸⁾	2,000KS/carat
 Demantoid Garnet	¹⁹⁾	2,000KS/carat
 Red Beryl	²⁰⁾	10,000KS/carat
 Alexandrite	²¹⁾	2000 to 7000KS/carat
Paraiba Tourmaline	²²⁾	12,000KS/per carat
Diamond Family		

Red Diamond	²³⁾	1,000,000+ /per carat+	
Black Diamond	²⁴⁾	3000 KS²⁵⁾	
Pink Diamond	²⁶⁾	5000 to 50,000ks/per carat	
Solarflare Sapphires	²⁷⁾	500-5,000ks /per carat	
Lunar Opals	²⁸⁾	300-\$3,000ks/per carat	
Stardust Diamonds	²⁹⁾	1,000-10,000ks/per carat	
Starlight Quartz	³⁰⁾	100-\$2,000ks/per carat	
Luminite Crystals	³¹⁾	50-500ks /per carat	
Galactic Opal	³²⁾	200-\$5,000ks/per carat	

Cabochons level

A cabochon is a gemstone that has been shaped and polished, as opposed to faceted. The resulting form is usually a convex (rounded) obverse with a flat reverse. Cabochon was the default method of preparing gemstones before gemstone cutting developed.))

 cabochons	Polished Gemstone Cabochons	20-200ks/per carat.
--------------------------------------------------------------------------------------------------------------------	------------------------------------	----------------------------

Manufactured Gemstones and Jewelry

 Customers can find beautifully crafted pieces made from gemstones sourced from the Mining Guild's mines. Necklaces, bracelets, earrings, and rings showcase the stunning range of gemstones available, each piece meticulously designed and handcrafted by skilled artisans.

- [Gemstone Orchid](#)

This area also houses a gemstone appraisal and consulting service. Expert gemologists are available to evaluate and authenticate gemstones brought in by customers. Additionally, customers can seek advice on gemstone selection, cutting, and setting for custom jewelry designs. Also in this area are manufactured gemstones, fake stones that could be replaced with real ones, as well as new special gemstones, that were created using a fabricator and inputting random molecular makeup of certain gemstones/crystals/mineral.

Other Level

The Other level of the Gemstone section also included rare crystals, mineral specimens, fossils, or even exclusive mining artifacts. Unique materials that go beyond traditional gemstones, these materials are sought after by jewelry designers and artisans looking for distinctive elements to create one-of-a-kind pieces. Visitors can find the following unique materials:

Meteorite Fragments	33)	50-\$500ks/per fragment.
 Moldavite:	34)	100-1000ks/per piece
 Fossilized Amber	35)	50-500ks/per piece
 Mother of Pear	36)	10-100ks/per piece
 Jeremejevite	37)	1,500KS/per carat
 Taaffeite	38)	2,000KS/per carat
 Poudretteite	39)	3,000KS /per carat
 Benitoite	40)	3,000-4000KS /per carat
 Musgravite	41)	6,000KS /per carat
 Alexandrite	42)	10,000KS /per carat
 Grandidierite	43)	20,000+ /per carat
 Painite	44)	200KS /per carat
 Serendibite	45)	50KS /per carat

Second Floor

The second Floor differs from the Ground level as this floor provides an assortment of precious metals, including gold, silver, and copper, as well as various alloys for crafting purposes. These materials undergo rigorous quality control processes to ensure the highest standards are maintained

Metal

- Specialized Materials (such as meteorite fragments, gemstone-embedded jewelry): Prices vary based on rarity and craftsmanship. Prices range from \$50 to \$5000.
- Raw Minerals and Crystals (such as quartz, tourmaline, fluorite): Prices range from \$5 to \$50, depending on the size and quality of the specimen.

Item	Per	Money
Aluminum	lb	0.9006ks
Cobalt	lb	19.400ks
Copper	lb	3.5503ks
Pure Chromium	100G	32ks

Gold	oz	1847.10ks
Iron Ore	mt	147.01ks
Lead	lb	0.9183ks
Pure Magnesium	100g	3.7ks
Bulk Magnesium	100g	0.29ks
Nickel	lb	8.0771ks
Palladium	lb	2265.00ks
Platinum	oz	1102.00ks
Silver	oz	27.325ks
Silicon	g	0.50ks

Item	Per	Money
Hyperpure silicon	oz	100ks
Steel	lb between	549 to 726ks
Titanium	lb	30.00ks
Zinc	lb	1.1560ks

Third Floor

The Mining Guild Emporium showcases the latest advancements in mining technology. The shop offers a variety of cutting-edge tools equipment, and starships including:

Technology

Electronic Software

- [Mineral Scanner](#)

The mineral scanner is both an advanced hand held scanner, and a starship system, that utilize high-resolution imaging, spectral analysis, and mineral identification algorithms. These scanners help miners identify and evaluate the quality of gemstones quickly and accurately. Price Range: 3-5k DS

Mining Drones

- [Tai-Pattern Rock-Splitter](#)

A small drone, it can uncomfortably fit in the palm of your hand, and is activated remotely. It does its best work if inserted into a small bore drilled into the rock face, but can drill its own hole if needed. Once activated, it has some basic sensors to guide it around large clusters of ore and not risk the damage of them, and a pair of spiralling lasers to act as a drill to cut through the rock. It is mostly designed for splitting open sections of large rocks so that miners can get to the ores inside more easily, though if piloted with skill, they can carve up smaller rocks and collect ores from baby rocks while allowing the miners to focus on larger rocks, if they so wish. It's not the purpose, but when is anything only ever used for its purpose?

- [Tai-Pattern Rock-Sucker](#)

A small drone, it can uncomfortably fit in the palm of your hand, and is activated remotely. It possesses four directional electromagnetic sluthes that activate on command and can stay active for four hours. These sluthes hover around an asteroid field and suck in ferric particles into their storage bays. Each bay can hold three kilos, for a total of twelve kilos of particulate matter. Not a lot on its own, but adds up over a large field. Price Range: \$2,000 - \$10,000,

Power Armor

- [ANT Power Armor](#)
- [Miner Undersuit](#)

Price: Undersuit: 50.000 Price: Power Armor: 250.000

Tools

- [Mole Claws](#)
- [Plasma Cutter/Torch](#)

Heavy-duty tools designed for mining operations, capable of penetrating even the hardest rocks.

Price: mole claws: 48 DS Price: Plasma Cutter/torch: 50 DS

Technological Gadgets

- [Mining Probe](#)

Mining Probes are special beacon based gadgets that mark locations of potential resource rich spots.

Price: 3-5k DS or 1.25k

- **Lapidary Equipment:** Lapidary equipment for cutting, shaping, and polishing gemstones, including faceting machines, grinding wheels, and polishing laps.

Starships

- [Magpie-class Industrial Cargo shuttle](#)

10.000.000

- [Stork-class Personnel Transport](#)

Price: 400.0

- [Dragon-class Mobile Refinery](#)

price: 1.194.444

Model Figurines

For fans of technology and science fiction, the almost last section of the third level of the Mining Guild Emporium is a veritable gold mine. This level is devoted to displaying a broad variety of exquisitely

accurate technical model figurines, each of which represents a different piece of famous mining machinery, cutting-edge technology, or robotic mining guild unit. Customers may explore an astonishing collection of technical wonders, which includes anything from tiny replica mining drones to towering model ships.

- **Mining Drones:** Customers can find model figurines depicting agile and versatile mining drones used for aerial surveys, exploration, and mineral analysis, as well as those part of the actual mining operation.
- **ships:** Those visiting will be able to see 1/8th scale model of the starships used by the Mining Guild, that can be seen flying around mining sites.
- **ANT Power Armor:** Featuring model figurines of the Mining Guild's advanced ANT Power Armor units, customers can marvel at the intricate designs and technological prowess of these Power Armors.

Each model figurine is meticulously crafted with attention to detail, capturing the essence of the Mining Guild's cutting-edge technologies. Customers can choose from various sizes, ranging from small-scale collectibles to larger, more elaborate centerpieces for display.

Clothes

The Mining Guild Emporium, nestled inconspicuously on the third level, harbors a hidden gem at its rear. Here, amidst a tableau of gleaming mining models poised for sale, lies a collection of attire that speaks volumes about identity and belonging.

Amongst the racks, predominantly adorned with casual wear, a series of T-shirts stands out, proudly bearing the insignia of the Mining Guild. Each shirt, meticulously crafted with the Guild's emblem emblazoned on the fabric, serves as more than just clothing; it's a symbol of camaraderie, dedication, and pride in one's craft.

These shirts are not merely garments; they're a testament to the hard work and unity shared among members of the Mining Guild. The insignia, boldly displayed, signifies a commitment to excellence in the field of mining and exploration. Wearing one of these shirts is not just about fashion; it's about embodying the spirit of the guild and carrying its legacy forward with honor.

For those who toil in the depths of the mines, these shirts offer a sense of belonging and solidarity, a reminder that they are part of something greater than themselves. And for visitors to the Emporium, they serve as a tangible connection to the world of mining, inviting them to explore its mysteries and wonders.

As customers browse the racks, they can't help but be drawn to these shirts, not just for their stylish designs, but for the story they tell and the sense of community they represent. In this corner of the Emporium, amidst the glittering models of machinery and tools, these shirts stand as a tribute to the unsung heroes of the mining world, their significance woven into every fiber.

Pookabuah Mines

Customers may visually tour a mine developed using data from all of the Guild's mining locations from [Sirris VI](#) to [Nephis](#) and potentially beyond using virtual reality stations at the Mining Guild Emporium. enabling the exploration of a brand-new, distinctive region where visitors can see how gemstones and minerals are extracted and purified before being able to buy it. They may even try on virtual jewelry that has jewels implanted in it.

Asteroid Run

Or if underground isn't to interesting, customers can still don virtual ANT Power Armor suits, and go out into space onto one of Draco Eridanus's asteroids, where they can to observe, and experience mining in a new way.

Year Released	YE 45

1)

including cabochons gemstones

2)

Both sourced directly from the Guild's own mines

3)

From sparkling white diamonds to vibrant fancy colored diamonds, customers can find a range of sizes and quality grades to suit their preferences.

4)

Known for their rich red color, the emporium offers a selection of ruby gemstones in various shapes and sizes, perfect for both jewelry enthusiasts and collectors.

5)

Featuring an array of blue and fancy colored sapphires, this section offers a diverse range of sizes and hues, showcasing the captivating beauty of these gemstones.

6)

Customers can find a selection of lush green emeralds, admired for their vivid colors and inherent charm.

7) 8) 9) 17) 18) 19) 20) 24)

nothing to see here!

10)

Topaz gemstones in a range of colors, including blue, yellow, and pink, known for their clarity and brilliance

11)

Beautiful purple amethyst gemstones in various sizes, suitable for both jewelry spiritual purposes

12)

Exquisite jade stones in various shades of green, representative of harmony and good fortune.

13)

Known for its unique banding patterns, agate comes in a variety of hues

14)

Offering a range of vibrant colors and patterns,

15)

: A mesmerizing gemstone known for its solid black color and smooth texture

16)

A remarkable gemstone with its distinct blue-green coloration

21)

This rare and mesmerizing gemstone displays color-changing properties, shifting from green in daylight to red under incandescent light.

22) 37) 38) 39) 40) 41) 42) 43) 44) 45)

nothing to see here

23)

known for its red hue, red diamonds are rare and very expensive.

25)

9000 per Dia

26)

Coveted for its exquisite pink hue, pink diamonds are among the rarest and most expensive gemstones in the world.

27)

Rare sapphires with a vibrant, sun-like hue.

28)

Opals displaying a mesmerizing play of colors reminiscent of the moonscape.

29)

Exceptionally pure and brilliant diamonds with minute stardust inclusions

30)

A rare and beautiful quartz variety with a mesmerizing star-like pattern

31)

Emitting a captivating luminescent glow((in the dark, Luminite Crystals are prized for their enchanting beauty. They come in different colors and sizes

[32\)](#)

Known for its iridescent play of colors, Galactic Opal is a highly sought-after gemstone. It is available in different sizes and shapes

[33\)](#)

Extraterrestrial fragments renowned for their cosmic origin and striking patterns

[34\)](#)

A rare green gemstone formed from meteorite impact

[35\)](#)

Ancient resin capturing delicate organisms, providing a glimpse into the past.

[36\)](#)

A shimmering iridescent material sourced from the lining of certain mollusk shells
