

OHI Standard Starship Crew Bunk

The Standard Starship Bunk was created in [YE 44](#) by [Osman Heavy Industries](#) in cooperation with [Yugumo Corporation](#). Inspired by Yamataian [capsule hotels](#), it was designed to maximize personal storage and comfort for its occupant, and to serve as a miniature cabin for use in bunkrooms on large ships, or in smaller starships where a full cabin for each crewmember is not feasible.

|-------------------|---|
| Year of Creation | YE 44 |
| Designer | Osman Heavy Industries , Yugumo Corporation |
| Nomenclature | OH-R1 |
| Alt. Nomenclature | Standard Bunk, Type 44 |
| Manufacturer | Osman Heavy Industries |
| Fielded by | SAoY , OHI , Yugumo Corporation , individual buyers |
| Availability | Mass Production |
| Price | 1,000 KS |

Function and Design

The Standard Starship Crew Bunk is built into a milled block of [Durandium Alloy](#) 2.5m long, 1.5m tall, and 1.56m wide. To meet the needs of its occupants, it features a comfortable mattress, a sliding [Transparent Durandium](#) privacy shutter with variable opacity utilizing [Omnihue](#), copious storage space on all interior surfaces aside from the privacy shutter, a multifunction computer with a display screen, and programmable interior lighting.

In addition to the features that one would expect from a starship bunk, the sliding privacy shutter is fitted with airtight seals that can be engaged or disengaged, allowing the SSCB to make use of a miniaturized climate control system tied into a life support system to become a self-contained environment. It is also fitted with a backup power supply, emergency supplies in the storage compartment below the mattress, and a small array of ion thrusters, enabling the bunk to be utilized as escape pods or shelters in the event of an emergency. Many small ships with few decks that make use of these bunks make allowances for the bunks to be ejected from the hull.

Security Features

The SSCB is also capable of being used as a makeshift brig. Users with captain-level authority over the ship may lock a bunk's privacy shutter closed and lock down many of its functions by activating Security Mode. In addition, when the bunk enters Security Mode, a licensed version of the technology behind Yugumo Corporaton's [Forcefield-Nested Isolation Doors](#) is used to generate a field to secure the privacy shutter.

Entertainment and immersive features

For the entertainment and comfort of its users the SSCB has multiple features for entertainment and immersion. Many of these features were included at the recommendation of [Yugumo Corporation](#). The SSCB features a multifunction computer and a linked screen, in addition to an [Omnihue](#) coating on the inside of the bunk and [Volumetric Windows](#) that allow the user to change the interior lighting of the bunk, or use the coating as additional screens. It also features a [basic solid volumetric system](#) that can be utilized with the entertainment features of the bunk.

In addition, the bed's control systems are compatible with [G1-N2 "Geist" Advanced Interfacing Implant 2.0](#) and other mindware, in addition to featuring a built in [Superconductive Quantum Interface Device \(SQUID\)](#). It comes pre-loaded with [Virtual Collective Experience](#), [Virtual Home Sleep](#), and Bednet/Legacy Bednet software all of which are capable of functioning with the bunk's solid volumetric projectors.

SAoY Standard Starship Bunk, Type 45

At the urging of a member of the [Yugumo](#) side of the bunk's design team, the team decided to create a

version of the bunk to be pitched to the [Star Army of Yamatai](#). Differences in this version of the bunk include different internal electrical components, for better compatibility with the Star Army's spare parts¹⁾, swapped computer hardware for better integration with [PANTHEON](#), and incremental ST backup, as implemented in the [Type 40 Bunk bed](#).

OOC Notes

[Alex Hart](#) created this article on 2022/10/30 15:01.

| Products & Items Database | |
|---------------------------|--|
| Product Categories | subsystems |
| Product Name | OHI Standard Starship Crew Bunk |
| Nomenclature | OH-R1 |
| Manufacturer | Osman Heavy Industries |
| Year Released | YE 45 |
| Price (KS) | 1,000.00 KS |
| Star Army Logistics | |
| Supply Classification | Class E - PARTS AND COMPONENTS |
| First Used | YE 46 |

¹⁾

And in fact, many of the components of the bunk were chosen to allow them to be used as spares for minor starship repairs
