

# Advancer Enterprises

A Biotech and Medical company formed in [YE 37](#), Advancer Enterprises aims to provide the world with new and cost effective treatments for various ailments while also improving the human condition.

1)

<b>Company Statistics</b>	
<b>Established</b>	<a href="#">YE 37</a>
<b>Leadership</b>	Mizumitsu Megumi, <a href="#">Berhane Ezana Aseri</a>
<b>Employees</b>	2,150
<b>Associated Factions</b>	<a href="#">Independent</a> , <a href="#">Yamatai Star Empire</a>
<b>Headquarters</b>	<a href="#">Fujiko</a> , <a href="#">Shenhong City</a>
<b>Nomenclature ID</b>	AE
<b>Specialization</b>	Medical Services, Biotech Equipment, Cybernetics, and Pharmaceuticals
<b>Nicknames</b>	Advancer, AdEnterprises

## History

Founded in [YE 38](#), Advancer Enterprises is a newly formed commercial enterprise that specializes in the pharmaceutical and medical divisions, with a small food service division. The corporation was organized from a combination of wealthy backers and investors, as well as small pharmaceutical and human enhancement laboratories who wished to pool resources and collaborate on their work to produce new and cost effective treatments for various ailments while also improving the human condition.

Advancer's first main headquarters, research facilities, and medical hospital are located in Tatiana's main city, nestled in one of the more Nepleslian dominated portions of the city. The main HQ takes up the 4th, 5th, and 6th floors of an office building, and handles business transactions and the day to day running of the corporation. Nearby is the corporation's small medical facility, where in-patient procedures and medical research are carried out within a private gated hospital and rest facility. The remainder of the corporation's facilities are located in an orbital annex, where a small 0g factory complex houses a manufacturing facility and shipping warehouse.

After the corporation was aquired by [Ryu Keiretsu](#) in [YE 43](#), Advancer's headquarters was moved to Crane Tower in Inuyama City. A larger research hospital/school was built in the northern sectors of the

city's Huang Industrial Zone, giving Advancer access to two hospitals. Mizumitsu Megumi (sister of the RyuK's President) was appointed as CEO, though operational control still remains largely in the hands of [Berhane Ezana Aseri](#).

## Corporate Goals

- To Develop and deliver the best possible medical technology and treatments possible
- To provide the best customer service possible.
- Advancer will at all times promote an atmosphere of multiculturalism and multinational cooperation.
- Remind the sector the importance of human lives and ability to contribute. (Humanistic)

## Operations

The operations of Advancer Enterprises is presently split into the following departments:

### Mechanics

The Mechanics Division of Advancer Enterprises is oriented around the development of new medical machinery, creating better ways of making the machines that treat patients. They received a mandate to design and produce medical supplies in [YE 44](#), greatly expanding their size and reach.

### Advanced Medical

The Advanced Medical Division is the largest and currently most well funded of Advancer's three divisions. The AM sections spearheads research and development in new medical technologies to turn theories into reality.

### Service

The Service Division is currently the smallest of the three Divisions, and is oriented around managing and supplying Advancer's food and medical service locations than developing new technologies.

## Products and Components

Advancer Enterprises has the following products for sale.

## Medical

Page	Price (KS)	Description
<a href="#">Delivery Nanites</a>	1.00 KS	Nanites designed to encapsulate a drug and deliver it to the precise point in the body.
<a href="#">MedicaGel</a>	88.00 KS	MedicaGel is a multifaceted wound treatment gel composed of peptides, stem cells, antibacterial agents, nano-machines, and a numbing agent called Endurance. The gel-cream accelerates natural healing, disinfects wounds, numbs pain, and self-degrades as the wound heals, eliminating the need for bandage changes.
<a href="#">Surgical Nanites</a>	500.00 KS	Programmable molecular scale semi-organic machines intended to perform various non-invasive surgeries.
<a href="#">AquaGenesis Fluid (Suaryoradone)</a>	1.00 KS	Artificial amniotic fluid used in a variety of medical uses from a medium to grow clones to a base for healing bodies.
<a href="#">TheraGel (Suaryoradone-2)</a>	1.50 KS	TheraGel is a nanite and nutrient rich material used to rapidly heal wounds. Designed primarily for humans and species similar to human biology.
<a href="#">Type 45 Standardized Field Medical Kit</a>	800.00 KS	The Type 45 Standardized Field Medical Kit is designed to give medical practitioners the tools to operate in away from hospitals
<a href="#">Advancer Enterprises Type 45 Vehicle First Aid Kit</a>	225.00 KS	Type 45 Vehicle First Aid Kit is a larger kit designed for medics and emergency personnel in mind.

## Pharmaceuticals

Page	Price (KS)	Description
<a href="#">Advancer Boost Cardiovascular Supercharger</a>	30.00 KS	A synthetic drug that can be released into the bloodstream on command. Supercharges the body's muscles, but creates large amounts of waste heat.
<a href="#">Alioradone</a>	70.00 KS	Alioradone is a complex medication known for its regenerative properties. It is a unique medication that is activated by low temperatures, specifically those cooler than 170K. Once activated, the drug stimulates cell regeneration at an accelerated pace.
<a href="#">Aniuzaline</a>	50.00 KS	Aniuzaline is an advanced haemostatic drug, developed to control excessive bleeding, especially in traumatic injury scenarios. It works by accelerating the body's natural clotting mechanisms, specifically enhancing platelet aggregation and the activity of clotting factors. Designed for emergency medicine.
<a href="#">Apiabin</a>	12.00 KS	Apiabin is primarily used to treat extreme agitation. It works by inducing a mild sedation effect, which effectively calms down the user to baseline levels.
<a href="#">Arievadine</a>	50.00 KS	A complex, groundbreaking medication primarily designed for the treatment of severe traumatic injuries. It stimulates the production of essential proteins like collagen and fibrin, which are crucial for tissue repair and blood vessel regeneration. Designed for emergency medicine.

Page	Price (KS)	Description
<a href="#">Aruonabin</a>	20.00 KS	Aruonabin is a psychoactive medication, primarily used in the treatment of mood disorders, hallucinations, and various forms of psychosis. The drug works by modulating levels of dopamine and serotonin, neurotransmitters that are crucial for mood regulation and perception.
<a href="#">Axalirine</a>	25.00 KS	Axalirine is a cardio-stimulant that has been designed to strengthen the cardiovascular system. works by enhancing the contractility of the heart muscles, thereby improving cardiac output. It used in emergency medical scenarios to stabilize erratic pulse and fluctuating blood pressure. It can also be used a performance drug.
<a href="#">Baipiline</a>	12.00 KS	Baipiline is an analgesic medication used in the management of mild to severe pain. It works by centrally on the nervous system, targeting specific receptors involved in pain perception.
<a href="#">Bronkalith</a>	25.00 KS	Bronkalith is a respiratory agent specifically formulated to treat conditions like asthma and chronic obstructive pulmonary disease (COPD). It functions by relaxing bronchial muscles, thereby facilitating better airflow and reducing symptoms like wheezing and shortness of breath.
<a href="#">Broplarine</a>	19.00 KS	Broplarine is an advanced synaptic stimulant and nootropic that is engineered to improve synaptic transmission. It functions by enhancing the efficiency of synaptic transmission, the process by which neurons communicate. This results in a cascade of cognitive benefits, including but not limited to, increased mental acuity, enhanced focus, better memory recall, and accelerated learning capabilities. The drug also promotes neuroplasticity, aiding in the development and survival of neurons and synapses.
<a href="#">Ciozaino</a>	18.00 KS	Ciozaino is a psychoactive medication developed to increase neuroplasticity in individuals who exhibit extremely rigid thinking patterns. It works by modulating synaptic connections and strengthening neural pathways, thereby enhancing the brain's inherent plasticity.
<a href="#">Cnalsium</a>	12.00 KS	Cnalsium is a central nervous system (CNS) regulator with broad applicability in the treatment of neurodegenerative disorders. By acting on various neurotransmitter systems and promoting neural health, Cnalsium offers a novel approach to managing these challenging conditions.
<a href="#">Gaillicaine</a>	20.00 KS	Gaillicaine is a potent, fast-acting sedative primarily used in the medical field to prepare patients for surgery. It's known for its ability to rapidly induce a state of sedation with minimal memory loss. It works by depressing the central nervous system, thereby reducing anxiety, inducing sleep, and causing a loss of consciousness if necessary.
<a href="#">Hemaspanol</a>	13.00 KS	Hemaspanol is a hematological agent used to stimulate the production of red blood cells (RBCs) in individuals suffering from anemia. It functions by stimulating the production of erythropoietin, a hormone secreted by the kidneys that triggers RBC formation in the bone marrow.
<a href="#">Juimosil</a>	60.00 KS	Juimosil is an incredibly complex medication primarily used in the treatment of intricate mental disorders. Each dose is typically custom tailored to the individual, taking into account their unique biochemistry, genetics, and specific diagnosis.

Page	Price (KS)	Description
Kardivin	20.00 KS	Kardivin is a cardiovascular medication specifically designed to increase the contractile force of the heart. By stimulating the myocardium, it increases the strength and efficiency of each heartbeat. This is particularly beneficial for individuals with heart conditions and to reduce the fatigue of individuals in "high octane" situations.
Metabovin	20.00 KS	Metabovin is a potent metabolic medication designed to regulate and improve overall metabolic processes. It operates by stimulating various metabolic pathways, including those involved in energy production, nutrient absorption, and waste elimination. The drug is particularly effective in optimizing the breakdown of carbohydrates, proteins, and fats, thereby increasing energy levels and promoting weight loss.
Myzakascin	40.00 KS	Myzakascin is a gaseous antibiotic that can be used to disinfect both the exterior and interior of the body owing to its non-toxic nature when appropriately diluted. It functions by disrupting bacterial cell walls, leading to bacterial cell death. It is particularly effective in treating respiratory tract infections, skin infections, and wound sterilization.
Neuropazine	25.00 KS	Neuropazine is a specialized neurological medication designed to improve nerve conduction and overall nervous system function. The drug is particularly effective in managing conditions characterized by nerve damage or dysfunction, such as neuropathy, multiple sclerosis, and certain forms of dementia by promoting the production and maintenance of the myelin sheath.
Nioriprofen	7.00 KS	Nioriprofen is an over-the-counter analgesic medication commonly used to treat minor to mild pain, inflammation, and high fevers. It is a non-steroidal anti-inflammatory drug (NSAID) that works by inhibiting the synthesis of prostaglandins, which are responsible for pain.
Onaiziasiane	30.00 KS	(For burns) Onaiziasiane is designed to tackle severe burns and facilitate skin regeneration. It employs a multi-faceted approach to healing, including the degradation of damaged skin cells, promotion of new cell growth, and stimulation of collagen synthesis and angiogenesis.
Oriemelin	30.00 KS	(Anti-Radiation) Oriemelin is an anti-radiation medication, designed to counteract the harmful effects of ionizing radiation. It operates on a molecular level, binding to DNA structures and thereby shielding them from ionizing radiation. It is effective in mitigating the acute symptoms of radiation sickness and reducing the long-term risk of radiation-induced cancers.
Oxirone	15.00 KS	Oxirone is a highly potent respiratory agent, specifically designed to manage and alleviate symptoms of respiratory distress. It's used primarily in emergency situations where rapid and effective response is needed.
Oxyazine	5.00 KS	Oxyazine is a detoxifying medication used in the treatment of severe intoxications. operates by forming complexes with harmful toxins present in the bloodstream and liver. These complexes are then metabolically transformed into non-toxic compounds that can be safely excreted through the kidneys. Great for treating acute cases of drug overdose, alcohol poisoning (we know what you did last night), and exposure to hazardous industrial chemicals.

Page	Price (KS)	Description
<a href="#">Oxydexanil</a>	12.00 KS	Oxydexanil is a potent medication formulated for the treatment of oxygen deprivation in tissues. It enhances the blood's oxygen-carrying capacity and optimizes cellular oxygen utilization. Useful for surgical work and as a performance drug.
<a href="#">Oxyethcin</a>	6.00 KS	Oxyethcin is a preventative antibiotic that is specifically formulated to halt the growth of small infections in their early stages. The drug is particularly effective against most types of bacterial illnesses. It operates by inhibiting bacterial protein synthesis, effectively halting their growth and reproduction.
<a href="#">Piafyrcaine</a>	9.00 KS	Piafyrcaine, a highly diluted version of Gailiamine, is used primarily in the management of insomnia and anxiety disorders due to its slower, more gradual sedative effects. It operates by modulating neurotransmitter activity in the brain, thereby inducing a calming effect.
<a href="#">Plateletine</a>	50.00 KS	Plateletine is an advanced hematological agent developed to stimulate the production of platelets in individuals dealing with thrombocytopenia. The drug acts on the bone marrow, encouraging the production of platelets—tiny blood cells essential for clotting.
<a href="#">Prostadir</a>	35.00 KS	(Organ regeneration) Prostadir is a organ-regenerative medicine that aids in the recovery and regeneration of various organ tissues. It operates at a cellular level, activating stem cells and directing them to replace damaged or diseased cells in targeted organs (with the use of delivery nanites or injection).
<a href="#">Riopiavire</a>	90.00 KS	Riopiavire is a specially engineered virus used for gene editing in patients who exhibit allergic reactions to nanites. This makes it a pivotal tool in genetic therapies where nanite-based methods are not applicable.
<a href="#">Ruomiline</a>	15.00 KS	Ruomiline is an analgesic medication designed for the management of severe, often debilitating pain typically resulting from severe injuries or conditions. It operates by inhibiting the transmission of pain signals to the brain, effectively reducing the perception of severe pain.
<a href="#">Ryaliamacin</a>	35.00 KS	Ryaliamacin is a broad-spectrum antibiotic, highly potent against a variety of bacterial infections. It's specifically designed to treat severe conditions such as wound infections, organ infections, and septicemia. It interferes with bacterial cell wall synthesis, disrupting their growth and proliferation. Its broad-spectrum action makes it effective against both Gram-positive and Gram-negative bacteria.
<a href="#">Suolaifen</a>	2.00 KS	Suolaifen is designed to provide relief from mild pain and fevers. It operates by inhibiting the enzyme cyclooxygenase, thereby reducing the production of prostaglandins, which are responsible for inflammation and pain.
<a href="#">Synaptine</a>	22.00 KS	Synaptine is an advanced neural drug specifically designed to boost the synaptic transmission in the brain. It operates by augmenting the production of neurotransmitters, thereby facilitating more effective communication between neurons. It is used to treat cognitive decline and neurodegenerative diseases. It is also used as a nootropic by healthy individuals seeking cognitive enhancement without cybernetics.

Page	Price (KS)	Description
Thermazine	15.00 KS	Thermazine is a powerful metabolic drug designed to stimulate thermogenesis. It functions by enhancing the body's metabolic rate and stimulating the production of heat through brown adipose tissue (BAT). The drug is effective as a weight loss drug and for individuals exposed to extreme cold conditions, as it aids in maintaining body temperature.
Venaline	10.00 KS	Venaline is a specialized medication that acts primarily on the venous system, particularly beneficial in managing venous insufficiency and related conditions. The drug aids in the improvement of blood flow back to the heart, reducing venous stasis and subsequent complications like varicose veins, leg ulcers, and deep vein thrombosis.
Viapanase	25.00 KS	Viapanase is a powdered anti-toxin medication designed to purge toxins trapped within the mucous lining of the respiratory system. It operates by enzymatically breaking down toxins (such as heavy metals and volatile organic compounds) lodged in the mucous lining of the respiratory tract.
Viequiril	27.00 KS	Viequiril is a bioengineered, fast-acting growth factor used specifically to combat bone and muscle mass loss. It operates by stimulating the production of osteoblasts (bone) and myoblasts (muscles) to counter traumatic injuries and disorders.
Viroxetine	5.00 KS	Viroxetine is an antiviral medication designed to target and inhibit a wide range of viruses. It is formulated to disrupt viral replication and inhibit the spread of viral infections within the body. It interferes with viral attachment and entry into host cells, thereby preventing the virus from infiltrating healthy cells and initiating infection (key during initial and early infections).
Voaxiesanar	200.00 KS	Voaxiesanar is a hormone-based medication used primarily in emergency medicine for the treatment of severe cardiac conditions. It acts by modulating the electrical activity of the heart, thereby normalizing cardiac rhythm and protecting other organs against hypoxia.
Xiorisin	50.00 KS	Xiorisin is a readily available over-the-counter cough medicine. It acts by inhibiting the cough reflex at the central nervous system level, providing relief from incessant coughing.
Zolirin	9.00 KS	Zolirin is a potent central nervous system (CNS) regulator, often employed in the management of epilepsy and seizures. With its unique mechanism of action, Zolirin offers a valuable treatment option for those suffering from these debilitating conditions.
Zuetase	20.00 KS	Zuetase is an anti-toxin enzyme designed to purge toxic particles within the bloodstream and organs. It operates on a molecular level, binding to toxic particles and rendering them inert. It works on heavy metals, narcotics, and certain venoms.
Zuopitran	13.00 KS	Zuopitran is a broad spectrum medication designed to calm and focus individuals with hyperactive behaviors and thoughts, rigid thinking patterns, anxiety, and depression. It acts by modulating neurotransmitters like serotonin and norepinephrine, thereby improving mood, focus, and overall mental well-being.

## Cybernetics and Nanite Augmentations

Page	Price (KS)	Description
<a href="#">Homeostatic Nanomachines</a>	1,000.00 KS	Nanites that enhance the immune system.
<a href="#">Advancer TIN System</a>	2,500.00 KS	A series of cooperating implants and nanomachines that give a human recipient limited empathic and telepathic abilities.
<a href="#">Advancer Iron Bone Enhancement</a>	3,000.00 KS	Special nanomachine treatment and implant that augments the user's physical strength and resiliency by combining bio-synthetic muscle enhancement with skeletal durandium grafts.
<a href="#">Zhenren Human Upgrade Package</a>	22,000.00 KS	A package of cybernetic implants and gene therapy for human and most human-derived species.
<a href="#">Advancer Omni Cardia Stasis Pump</a>	500.00 KS	Replacement cybernetic heart that sustains its host in a form of medically-induced stasis when in critical condition until they can be revived
<a href="#">Shin Mental Backup Implant</a>	5,000.00 KS	Developed in between YE 40 and YE 44, the Shin (神 in Yamataigo or Shén in Lianjia Speech) Mental Backup Implant (ShMBU) is a neural cybernetic implant designed to work as an as stand-in or supplement for Soul Transfer technology. It does so by assisting the development of short-term memories and speeding the conversion to long-term memories. Also maps and saves key data points to save the personality of the user. It entered the market in YE 45.

## In Development

- [Advancer Enterprises Research and development](#)

## Key Staff

- Chief Operating Officer: [Berhane Ezana Aseri](#) - A former Mining foreman on Nepleslia, brings a strong sense of ethics and "Get it Done" to his position.

## Facilities

- [Fujiko IV](#) Facilities
  - Main Headquarters
  - Treatment Hospital
  - Factory Complex
