

SnS 35mm Guass Rounds

The 35mm Depleted Thorium Slug is a high-impact ammunition designed for use with [Shasta No Sekai](#) Gauss weapons. It is commonly used in combat scenarios where penetrating power and armor-piercing capabilities are required. The ammunition delivers devastating kinetic energy to the target, making it highly effective against heavily armored opponents.

History of the 35mm Depleted Thorium Slug

The development of the 35mm Depleted Thorium Slug began in the year YE:44 by Shasta No Sekai Corporation in response to the increasing demand for high-impact ammunition capable of breaching advanced armored defenses. The goal was to create a slug that could effectively penetrate and disable heavily fortified targets.

Leading engineers and ballistics experts mainly being of the Kuzynetski collaborated on the design and manufacturing process. Extensive research and testing were conducted to ensure the optimal performance and safety of the ammunition.

The 35mm Depleted Thorium Slug was officially introduced in YE:45, marking a minor deviation from the corporations average use of energy weapons. Its deployment greatly enhanced the firepower and combat effectiveness of mechs equipped with Gauss weapons.
