

Finger Pistol

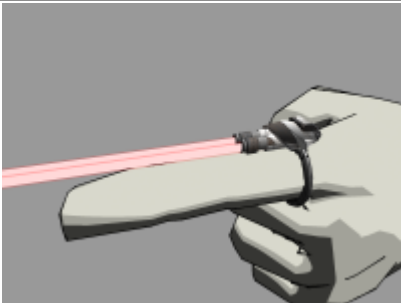

The *Finger Pistol* is a single use, Niche weapon primarily designed for personal defense by the [Shasta No Sekai](#) corporation in [YE 40](#).

About the Finger Pistol

The *Finger Pistol* was designed by the *Shasta's World* corporation under the orders of its founder and CEO, [Shasta Archeletta](#) for a simple, concealable weapon designed for use in her *hobby* as a bounty hunter. The end result after tinkering with the newly designed [Micro Laser](#) weapons system proved an appealing solution to that matter.

After a degree of trial and error the end result was less than intended but still fit the requirements after several attempts to make the weapon hold a charge or fire repeatedly caused a small detonation that removed an R&D testers forefinger and part of his thumb. More tests where made, this time using the weapon on manikin and false hands to the same result. The end product was a single shot weapon concealed within a moderately sized ring that drains an entire [micro cell](#) in one shot.

The product was then delivered and upon satisfying the *Mad Mutant's* request was put on the corporations sales catalogs for the simple price of 100DA.
