

ThorCore Design

The ThorCore design concept was developed by [Tamahagane Corporation R&D](#). It became available in [ye_35](#).

About the ThorCore

The purpose was to come up with a way that the [Corporation](#) could allow product lines to be shared withing its holdings. Typically the same design is rebranded when marketed by one of the other holdings, and has systems from that holding.

This design standard focuses on specific components, it establishes specifications as to size, power output, and connectivity. Devices created to this concept can be installed in any vehicle designed or modified to make use of it.

Any product featuring this will have the following logo on it.

The standard can be applied to the following systems:

- Power
- Control
- Communication
- Propulsion
- Weapon
