

Hoverboard Extreme Clothing Gear

The [Hoverboards](#) Extreme Clothing, Gear is a special gear used by teams while also using the hoverboards

About HECG

The Extreme Hoverboard Sports Wear is a clothing type item used by many people, [Independent](#) of any [Faction](#) and some sponsored by them or [Corporations](#) in the [Kikyo Sector](#) and abroad beginning in [YE 45](#). While it would be fine for Hoverboarders to use the Hoverboards without clothes on the Yugumo Corporation Board thought that in order to brand outside of Yamatai they needed to come up with a special outfit to wear with the Hoverboard, especially to prevent loss of life from occurring.

That was in addition to the fact that teams and sponsors could add them to the outfits for advertising needs. The Extreme Hoverboard Sports Wear comes in many colors and designs depending on whether the Hoverboarded is a part of a team or organization or is simply a casual user.

Cost

Name	Cost
Helmet	140/ KS
Body Suit	149/ KS
Pads	23 ¹⁾ 69 ²⁾
Total	359 KS

Availability

The Gear is available in all [Yugumo Corporation](#) Stores, in [Yamatai](#), and outside of it.

History

Following the thought and work she'd done on the other items as part of her work on the Hoverboards, and the requests by the Yugumo Board, Yue knew that she won't be able to work on the next on her own. Instead, she finally left the workshop and had gone to Yugumo Corp's clothing department and had gained some help from them about what she needed.

With that done and a promise to try out new outfits she returned to her terminal and got to work and eventually the Hoverboard Full Gear was born. She felt pleased that her work was done and in time too as she'd be going with the others on the Colonial Initiative.

Hoverboard Helmet

Like all helmets, the Extreme Hoverboard helmet has two primary components, and these specific components are known as the outer shell and inner shell. The outer shell, the exterior of the helmet is made out of either plastic or fiber materials such as carbon fiber, fiberglass, Kevlar or [durandium](#). This allows for the protection of the head from debris, or getting slammed. The inner shell, aids this by being made of expanded polystyrene (EPS), as well as a soft lining and padding.

Scuba Tech

When attached to the bodysuit, the helmet acts as a breathing device, allowing the wearer to breath if they had been forced to enter an underwater environment. This allows for a continuation of life and gives time for their team to get them to safety.

Hoverboard Sports Bodysuit

The Hover Board Body Suit is made out of a material that is comfortable to the touch and is made of a material that like [swim suits](#) is specifically made so that if an Athlete falls into the water for whatever reason the outfit won't pull them down under ad make it difficult for them. Further, the suit and the helmet connect together and when it does, it hermetically seals to allow for behavior similar to that of a diving suit. This allows the wearer to breathe even while forced under water. The bodysuit rejects temperatures in the environment around and replaces it for the body. So instead of an extremely hot environment, the body would be cool and comfortable. Same goes for cold environments, the body will be warm and comfortable.

The suit is also able to easily fit the wearer's body, by automatically fitting to the wearer. By Making the outfit fit the person, any insecurities and things about their body might be seen in some cases if the wearer isn't careful. The material also allows for certain advertisement or sponsors to be shown as the athlete go about their sport.

Hoverboard Pads

Hoverboard Pads are special extra additions to the Hoverboard gear for extra safety. These are made of materials similar to those in the Helmet that protect from injury if the athlete isn't on a water based sports environment. The Pads are

- The Chest Pads
- The Arm Pads
- The Crotch Pads
- The Knee Pads

Usage

The Hoverboard full gear is worn like clothes, with the body suit covering the body and the helmet covering the head. This is followed by the pads, covering the chest, arms, knees, and Crotch,³⁾ Those seeking to clean the Full gear should follow the same instructions as those followed by the other sports items.
