Product Source is currently salvage and stockpiled stock and is no longer being produced. Please contact the [Yugumo Corporation](#) for more information.

Power Armors this weapon is used on:

- [Tenshi no Yoru 'Tenshi' Light Mechanized Power Armor](#)

About The Pacifier Gun

The [Motoyoshi Fleet Yards](#) version of [NovaCorp's](#) Xaser Pulse Canon's Pulse Energy Projectile Setting used on the [NO-M1-1a - Mantus Infantry Power Armor](#).

A low-output Infrared Pulse Cannon. It functions by emitting an infrared laser pulse that when comes in contact with the target it evaporates part of the surface, which creates a small amount of exploding plasma which then results in a sound and shockwave. This shockwave has the ability to stun the target alongside the electromagnetic radiation it produces affecting the target's nerve cells to cause great pain.

The weapon has two settings: Non-Lethal and Lethal.

In the lethal setting, it creates a larger plasma explosion one with enough power to kill.

- **Primary Purpose:** Anti-Infantry.
- **Secondary Purpose:** Anti-Civilian.
- **[Damage Rating \(Version 3\)](#): 0 (Stun/Non-lethal mode), Tier 3, Heavy Anti-Personnel (Lethal Mode).**
- Range: 500m in atmosphere.

- Rate of Fire: 1 pulse per second.
- Payload Effectively unlimited while the power source still functions.
