

Azure I Series Anti-Gravity System

The *Azure I* Series Anti-Gravity System is an enhanced gravity modulation system developed by [Yugumo Fleetworks](#) in late [YE 44](#). Full, unrestricted versions of the system are fielded by the [Star Army of Yamatai](#) and [Yugumo Corporation](#), but restricted versions are available for sale to vetted clients.

Year of Creation	YE 44
Designer	Yugumo Fleetworks , Mazaki Seina
Nomenclature	See Nomenclature Catalog
Manufacturer	Yugumo Corporation
Fielded by	Yugumo Corporation , Star Army of Yamatai
Availability	Mass Production
Price	Varies

History

Named for the lovable [fan-favorite](#) of [Midnight Infinity](#), the *Azure I* Series Anti-Gravity System is a propulsion system optimized for use in gravitational bodies. Designed to counteract, modulate, and *optimize* the effects of gravity and inertia on its host unit, the *Azure I*'s functions include propulsion, inertial manipulation, gravity manipulation and even signature reduction. However, it should be noted that the latter function of signature reduction is largely restricted for use by the [Star Army of Yamatai](#) and in [Yugumo Corporation](#)'s internal operations.

Function and Design

Emitters are placed on select outer panels or hull surfaces on the mounting platform, giving omnidirectional gravity and inertial manipulation. Via these functional units, the *Azure I* has the following capabilities.

Signature Reduction

The *Azure I* can modulate and nullify the gravitational and mass distortion signature of the mounting platform. In doing so, it can render the host effectively invisible to [subspace mass](#), mass, electrogravitic, and gravitational sensors. This capability is restricted to the [Star Army of Yamatai](#) and internal [Yugumo Corporation](#) use.

Inertial Manipulation

By manipulating the mounting platform's inertia, the *Azure I* not only enables better fine control, but also

boost the erratic nature of its maneuverability. In effect, the movements of the mounting platform can be as nearly as sudden and unpredictable as the operator can think, enabling it to stop or accelerate at will and in an instant.

Gravity Manipulation

The *Azure I* can modulate the gravity of the mounting platform to a wide range of functions. Within the context of power armor, it can allow the user to perform feats including, but not limited to, walking upside down, hovering in midair, and delivering gravity-enhanced [striking attacks](#). These capabilities are somewhat echoed for small craft and starships, in not only offering benefits to maneuverability, but also improving hovering and [loiter](#) time.

Nomenclature Catalog

Catalog of [Standard Product Nomenclature System](#).

Yoru no Tenshi 'Tenshi II' Light Mechanized Power Armor	Yu-M1-P4503
Mōkin-Class Patrol Craft	Yu-V1-P4503
Mozu-Class Starfighter	Yu-V2-P4503
Taka-Class Shuttle	Yu-T1-E4503
