

# Kaminari Quantum Foam Generators

A power generation system that was originally produced by [Eien Power Systems](#), a division of [Motoyoshi Fleet Yards](#) in [YE 30](#). The Generators continue to be produced by the [Yugumo Corporation](#) even though [Aether Power](#) tends to be used more in most applications in [YE 42](#).

In [Yamataigo](#), Kaminari translates to thunder.

## About Kaminari Quantum Foam Generators

Quantum Foam is a type of dimensional power, it taps into the Quantum of Space-Time foam that makes up the universe, a sea of virtual particles snapping in and out of existence, and wormholes existing for fractions of a second, and takes some of the energy from this. Quantum foam is an amazing potential source of energy, enough energy to boil all of a planet's ocean every second, for every cubic centimeter. However, the Kaminari Generator cannot tap all the energy, and can only take in a fraction of this energy. This technology was utilized first by [NovaCorp](#) and then improved upon by [Eien Power Systems](#) in [YE 30](#).

Kaminari Quantum Foam Generators	
Designer	<a href="#">Yugumo Corporation</a>
Nomenclature	Current - Type 42
Manufacturer	<a href="#">Yugumo Corporation</a>
Fielded by	<a href="#">Yugumo Corporation</a>
Production	Mass Production
Price	Negotiated

## Capacitor Systems

So that the generators are not constantly in usage during non-combat operational mode or stealth mode; they run for a period of time to recharge the capacitor system and then shut down. This is done to limit the amount of time the ship is visible on aetheric/quantum sensors.

Capacitors are typically in the crawl spaces off of engineering. These two large banks are the super-capacitors that hold enough energy for the base to operate in cruise mode for one day without utilizing either the primary quantum foam generator. In combat mode, the base or ship can operate for roughly twenty minutes at theoretical maximum offensive and defensive system outputs.

## Emergency Capacitors

The Emergency Capacitors are typically located in the Systems Bay. They are recharged by either the quantum foam or link siphon system and can power basic systems such as life support, engines (30% of

usual power), imaging arrays, the lift system, and the communications array.

## Nomenclature Catalog

Catalog of [Standard Product Nomenclature System](#).

<a href="#">Starchaser III-Class Ferry</a>	Yu-Y2-G4200
<a href="#">Misha-Class Explorer</a>	Yu-Y1-G4300
<a href="#">Seiza-Class Cargo Hauler (1B)</a>	Yu-L3-G4300
<a href="#">Asuga-Class Tug</a>	Yu-L1-G4200
<a href="#">Shuryoku-Class Super Freighter</a>	Yu-L2-G4200
<a href="#">Yūgure-class Merchant Destroyer</a>	Yu-D1-G4300
<a href="#">Yoru no Tenshi 'Tenshi II' Light Mechanized Power Armor</a>	Yu-M1-G4200

## OOC Information

- The page was originally created before OOC information was required.
- Page was updated by [Andrew](#) on 02/01/2020.
- Condensed in old Capacitor System Article on 1/03/2021.
- [Standard Product Nomenclature System](#) update by [Yuuki](#) 2022/09/07

Products & Items Database	
Product Categories	subsystems
Product Name	Kaminari Quantum Foam Generators
Nomenclature	Type 42 - Kaminari Quantum Foam Generators
Manufacturer	<a href="#">Yugumo Corporation</a> , <a href="#">Yugumo Fleetworks</a>
Year Released	<a href="#">YE 42</a>
