

# Zen Armaments 10mm Covert Ops Pistol

The 10mm Covert Ops Pistol is a pistol designed by [Zen Armaments](#) sometime between [YE 17](#) and [YE 22<sup>1\)</sup>](#).

*With and without silencer:*

Price: 350 KS

## Overview

Rarely seen outside the [Red Army](#), which issued the silencers as stock equipment. These pistols are very accurate shooters, and while the silencer tends to reduce effective range and accuracy, it's still good for 30 m. The pistol's built very slim, designed with a single-stack magazine to be as concealed as possible. Also, the caliber and design of the weapon are purposeful; the weapon's barrel is identical to that of a KZ GSP, only threaded, meaning old [Yamataian](#) weapons found on [Kennewes](#) can be used in place of the stock barrel, if desired.

Damage ratings:

- [DRv3](#) Tier 1
