

# Civilian Laser Communication

A solid-state laser used to carry information on a tight beam, the Laser Communication system is a Light Speed system that is hard to jam and intercept. Because of this, Laser Communication is limited in range because of the speed of transfer.

Civilian Laser Communication Systems have the shortest ranges and only minimum encryption protocols.

## Range Variation

Ship Type	Effective Communications Range	Maximum Communications Range
Small Craft	0.5 Light Seconds (299,792 Km)	1 Light Second (299,792 Km)
Small Transport	2 Light Seconds (599,584 Km)	2.7 Light Seconds (809,439 Km)
Large Transport	4 Light Seconds (1,199,169 Km)	5 Light Seconds (1,498,962 Km)
