

Standard Reactor Room

A facility dedicating to holding one of a starships many power generators, the Standard Reactor Room has enough room for a single reactor. This enables a vessel to have their reactors in different places on a ship to protect them from a catastrophic loss of all reactors that a single engineering facility has.

Depending upon the type of reactor in the Room, whether a Main or a Secondary, the Room can be labeled as Main Reactor Room 1 (Main Reactor 1) or Auxiliary Reactor Room Two (Aux. Reactor 2). These facilities are generally run by a senior NCO and five Enlisted personnel, though Main Reactor Rooms may have a single Officer in command.

A [Abwehran Fire Suppression Locker](#) and [First Aid Station](#) can be found near the entrance.

Personnel Requirements

Note: Personnel are listed on a per shift basis.

Main Reactor Room

Total Personnel: 7

- 1 Engineer (officer)
- 1 NCO Technician
- 5 Enlisted Technicians

Auxiliary Reactor Room

Total Personnel: 6

- 1 Senior NCO Technician
- 5 Enlisted Technicians
