Multipurpose Palm Computer

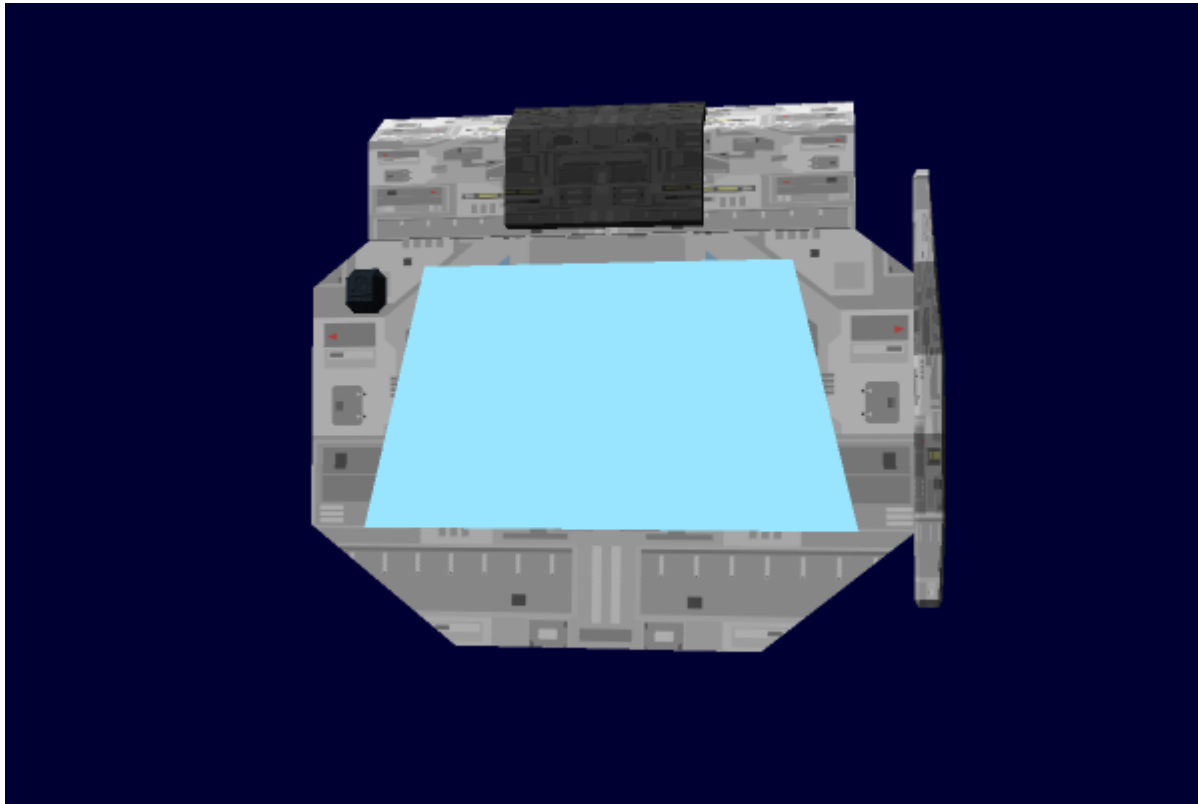

- Dimensions: 15cm x 15cm x 2cm (6' x 6' x 2')
- Suggested Price: 3000 Credits

A CU-23 Computer System found all over the Abwehran Star Empire, the Multipurpose Palm Computer is used by both civilian and military personnel. The Palm Computer uses Molecular Circuitry and processors created from Nano-Transistors so it can operate at the dimensions of 15 centimeters by 15 centimeters by 5 centimeters. Data is stored using Holographic Data/Memory Storage with the ability to use a Holographic Storage Cubes of various sizes for data/media transfer. Data cubs can be inserted via the top side slot. The display is a small FED Display with touch sensors so it can be utilized as both a screen and a keyboard. This can be done by using either a finger or the stylus attached to the right side of the computer. The newest model of Palm Computer was designed in YE 32 and is supposed to have 400 GB of storage. It is also capable of connecting wirelessly to a variety of electronic equipment from sensors to larger computers to even nanobots[1].
