

200mm Artillery Railgun

Primarily used on Aerial and Naval vessels, the 200mm Railgun is used specifically for artillery support and Anti-Ship operations. For Aerial ships, the 200mm enables close air support operations and anti-air operations against other aerial warships. For Naval vessels, it enables shore bombardment and anti-ship operations at close-ranges. These newer models are contracted to be mass-produced in AF 260 (YE 31).

Primary Role: Artillery Support Secondary Role: Anti-Ship Range: 200 kilometers Rate of Fire: One round per Five seconds Muzzle Velocity: Varies from 2000-6000 meters/second
