

Chelti 6mm AR APT Ammunition

Ballistic capped ammunition with tracer inside bullet sheath. Used in 6mm assault rifles, found commonly around any users of the weapon. It is sometimes used due to the tracer element being less visible to enemy spotters due to the tracer element being behind the bullet. Some rounds may have oxidizer pellets mixed into its powder charge. It is mostly manufactured in multiple chelti arms depots. It sells for 150KS per 100 round box.

Stats

- Damage Rating: Tier 2, Medium Anti-Personnel
