

HS-AU1-1a Beâgor'a Âdor - Fiqorka Vymaor'a (Passenger Module)

The Fiqorka Vymaor'a was developed for use with the [HS-AU1-1a Beâgor'a Âdor \(Sky Hauler\)](#) to allow transport of the [Stako Yanuto \(Exo-Skel\)](#). It came into use in [755 CY \(YE 36\)](#).

This module is for carrying personnel, either armored or not. It has two large manual doors on the front, and four windows to allow light in during travel. The module has six mating connections for the claw tips to engage.

Dimensions

- Length: 12 m (39.36 ft)
- **Width:** 6 m (19.68 ft)
- Height: 3 m (9.84 ft)

The default configuration allows 162 uniformed soldiers, or 81 [HS-PD1-1a Anoka'ano Dahome \(Combat Armor\)](#) clad ones. It consists of three rows of seats along each of the sides. This leaves a 1.5 meter wide area in the center which could be used for equipment.

Maximum configuration would add two more rows in the center. Taking capacity to 216 uniformed soldiers, or 108 [HS-PD1-1a Anoka'ano Dahome \(Combat Armor\)](#) clad ones. However, there would be no additional storage space available.
