

# Jyaon Ruo'sa (Medium Bridge)

This is the most common bridge used by the [Poku Saeruo Degonjo](#).

The bridge is hexagonal in layout. It has four manned stations, a [Uosme Wunyasa \(Life Station\)](#), and a [Ânamusme Wunyasa \(Damage Station\)](#). The ceiling is a parabolic curve which allows the Ta'a to hear anything said on the bridge, [Tyo'te Wuny'ta \(Fire Suppression\)](#) ports dot the ceiling. The floor is covered in [Loop-Pile](#) carpet, colored clan gray (charcoal gray). Hull braces composed of [Mâqirây \(Bound Metal\)](#) protrude from the walls.

The bridge has two side passage the one on the starboard leads to the war room, and the port leads to the fire control.

Access to the bridge is through a [Anomu Wunyte \(Security Door\)](#) at the rear of the bridge.

Each bridge station is a [Makoa Kâbo'ka \(Work Console\)](#) with a [Buvoli Kâbo'ka \(Work Chair\)](#). Next to each bridge station is a storage locker for use by the person manning the station.

## Overwatch

The center station is called the Overwatch. During normal operations this is where the Tin-Ta'a or Ta'a commands the ship. The station rotates to allow the Ta'a to see any of the other stations. During combat the Tin-To'â takes charge of the bridge. The rotate is mainly so that the leader can face the crew member directly.

## Pilot/Helm

This station is located in the front of the bridge, and is where the senior pilot flies the ship during the primary shift.

## Sensor/Navigation

This station is located on the port side of the bridge towards the rear. The person manning this is responsible for calculating wormhole paths, and plotting intra-system trajectories.

## Comm/Ship

Located to the starboard aft of the bridge, this station controls and monitors all communications systems. It is also capable of monitoring various ship systems.
