

HS-SD1-1a Gulvi-ka Mui-Class Ship

The Gulvi-ka Mui is an envoy ship for the [Poku Saeruo Degonjo](#), it became available in 752 CY ([YE 33](#)).

About the Gulvi-ka Mui class

The Gulvi-ka Mui, or Sword of Mui is the most unique class of ship that the [Poku'vonai](#) have constructed since the [Poku Movi Vamâqi \(Clan Void Berth\)](#) was completed. It was commissioned after they encountered the [Defilers of the Dead](#). It is a warship built to carry emissaries to the [Warrior Cat Women Clan](#). It is armed so that the [Vonai-Rya'ka \(Emissary\)](#) can do so from a position of strength. There are only two of them built. It was designed and constructed under the guidance of [Kohaku Syali](#).

Appearance

The Sword bears a strong resemblance to the [Sakura-class Light Gunship](#). This is because it was built using parts of the hull of several Sakura. It has a single sword blade in the bow; from which it takes its name. It is painted in standard [Poku Saeruo Degonjo](#) colors. The shuttle bay can be seen on the upper

stern, and two [Tinvymai Tyokame \(Plasma Drives\)](#) are present on each wing. From the end of each wing a [Âmanus Rotyka \(Annihilation Cannon\)](#) protrudes when active. The Sword is 37% larger than the [Sakura-class Light Gunship](#).

History

With the outbreak of the sector wide [Second Mishhuvurthyar War](#); the mindset of the clan was changing. Isolation had been their way, but [Mui \(Clan Leader\)](#) Tarbah Leyto realized that for her people to survive change was inevitable. When she appointed [Kohaku Syali](#) as [Vonai-Rya'ka \(Emissary\)](#) she took a page from their history. Emissaries were always sent on a formidable ship of their own design. So she gave [Kohaku Syali](#) control over the design.

[Kohaku Syali](#) started reviewing resources and wanted a ship that would be unlike any other clan ship, but embody its attributes and add some aspects of the ships she served on in her prior life.

She found several [Sakura](#) hulks that clan had acquired. She chose them to be the frame work for the design. They were brought to the [Poku Movi Vamâqi \(Clan Void Berth\)](#) where they were stripped of their [Yamataium](#) hull and systems. The frames were then cut and spliced together to create a longer silhouette, and the Sword was born.

Since the Clan admired the Blade ships of the [Poku Loi Daho'ai \(Clan of Female Warriors\)](#) she chose to keep the upper blade from one of the ships. Modifications soon followed with the addition of dedicated shuttle space, and expanding the upper hull.

The interior was completely reworked and standard clan interiors were installed.

[Kohaku Syali](#) added a few alien items to the design to facilitate her mission. The design was completed in 752 CY ([YE 33](#)).

Systems

Armor Hull

The *Gulvi-ka Mui* has a one meter hull that is constructed on a [Mâqirây \(Bound Metal\)](#) frame, covered in [Saemâqi \(Star Metal\)](#) plating.

Computer

Unlike the warships of the Hidden Sun Clan, the *Gulvi-ka Mui* uses a [Jodau Yoqajo \(Integrated Brain\)](#) for its primary computer system. Many sub-systems and stations use [Iginâ Jodau'ta Fiqorka \(Neuron Processor Module\)](#) for additional computational power.

The first *Gulvi-ka Mui* was also equipped with a resurrected [MEGAMI](#), to facilitate data transfer with the [Poku Loi Daho'ai \(Clan of Female Warriors\)](#). Upon completion of negotiations, the system was removed and given to the Star Army. Other models of this design will not have this equipment as it was removed upon completion of negotiations.
