

# Mâhoai Âdor (Sky Harbors)

Mâhoai Âdor are the *Poku Saeruo Degonjo* version of planetary spaceports. With the colonization of the *Otâgo'lâmai (New Worlds)* they came back into use in 755 CY (YE 36).

## About the Mâhoai Âdor

Mâhoai Âdor pronounced *mâhoaē ādōr*, are commerce and travel oriented and possess varying levels of repair facilities. They are not shipyards. There are three types of sky harbors, small, average and large. The larger the facility the more extensive the facilities. All sky harbors of a particular size have the exact same layout and capability. Mâhoai Âdor are designed to be self-sufficient and provide their own infrastructure.

## Facilities

These are the facilities that comprise all Sky Harbors. The size of the facilities and number are determined by the station size.
