

Udano Veltin (Gravity Spike)

This is the technology used the [Poku Saeruo Degonjo](#) to prevent FTL travel. It has been in used since the clan arrived in the Kikyo sector. 25 CY (YE -694).

General

Class: Denial Nomenclature: HS-S4-W1101 Type: Anti-FTL Designers: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) Manufacturer: [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) on [Poku Movi Vamâqi \(Clan Void Berth\)](#) Note: The Udano Veltin is mounted ventrally on the ship it is installed on.

Description

The Udano Veltin system harnesses the power of the ship's [Tinvyma Movidoanor \(Tunnel Drive\) Heim Force Generators](#).

When activated the Udano Veltin targets a specific point in space below the ship, typically 1 KM. It creates wide ranging gravimetric distortions. The distortions are sufficiently strong that they create an [Anti-FTL Field](#).

A ship that is producing a Udano Veltin, can not fire a [Udano Rotyka Sakopa \(Gravitic Shock Cannon\)](#) if it has one; as the power comes from the same source.

Area of affect: Diameter of .5 AU or 75 million kilometers or 46.5 million miles Rate of Fire: As long as the Udano Veltin is operating the [Anti-FTL Field](#) remains in effect.
