

Recent Iromakuanhe History

AR 600

00's

- Launch of the Lokpala V scouting probe into outer space.

10's

- Bicentennial celebration of the completion of [project starwinds](#).
- Space colonies are established around the worlds of the inner [Iruotl System](#), following the success of the orbital elevator cities.

30's

- Lokpala V explores a nearby star system, but it is unsuitable for colonization.
- [MASC Drive](#) perfected.
- [MASC-based](#) communications revolutionize interplanetary communications and strengthen the [Commonwealth's](#) powerbase.
- [Mazerin](#) adopts [Iromakuanhe Arcology](#) system and multiple habitation superstructures are built across Commonwealth space.
- Beginning of Second Space Age.

40's

- [Altjira Biomedical](#) develops self-contained agricultural cycling techniques which allows the construction of large-scale agricultural complexes.
- Lokpala V is dragged into the gravity well of a gas giant and destroyed after charting a 10 LY sphere around the [Iruotl System](#).
- 15% of all [people](#) live in space.

80's

- [Mazerin](#) comes under attack by raiders, resulting in the Battle of Maral Fuiz.
- First Outer System Conflict between independent pirate kingdoms and [Commonwealth](#) Defense Force.
- Outer System kingdoms sign an armistice and made member provinces of the Commonwealth.

90's

- Military restructuring separates the security forces of the various colonies and the national military, leading to the creation of the [Astral Vanguard](#).
- [Temple Guard](#) given membership into [Astral Vanguard](#) forces, separate of their own hierarchy.
- Commonwealth National Security Agency split up into [Vanguard Intelligence Agency](#) and standard police forces.

AR 700

70's

- Project Vanguard Autonomous Drone Weapon prototype is presented by [Solan Starworks](#) to [Astral Vanguard](#) to serve as its new front-line unit.
- [Project Vanguard Deployment Ranger](#) prototype is simultaneously completed by a separate division of Solan, and outstrips VAADW unit in nearly all attributes

80's

- [So-M1-1A Erla VANDR](#) is mass-produced.

90's

- Second Outer System Conflict started when separatist forces seize the Deuterium and Tritium harvesting facilities over the gas giant Grand Mazerin. Using the new [M1](#), [Astral Vanguard](#) forces decimate and disperse the aggressors.
- Legislature bans claims to sovereignty made by any [people](#)-founded colony, and requires registration by all colonial authorities.

AR 800

00's

- [Project Artifice Phantom](#) started.

10's

- [Ahmida Civiltech](#) founded.
- Lokpala X probe is launched.
- 55% of [people](#) live in space, with 15% in elevator cities and 40% in space colonies.

20's

- [Vanguard Intelligence Agency](#) purges 7 Commonwealth government ministries of corruption, leading to a massive restructuring of the [Government of the Astral Commonwealth's](#) bureaucracy. Automation and digital integration become the norm.
- Partisan system abandoned as colonies become more independent and [iromakuanhe_astral_commonwealth](#) made into a multi-planetary confederation, with extensive autonomy.

30's

- First [NI](#), known as Tiamat is created in secret.
- Over the next five years, two more experimental NI, Lakshmi and Enlil are also developed, and the project is made public.

40's

- [OGNEIR.net Commonwealth Communications Grid](#) is created from the various commercial communications networks and placed under government regulation. Hackers and criminal societies create and weave private networks into the system to maintain their anonymity.
- Tiamat goes berserk and is isolated and destroyed before she seizes control of [OGNEIR](#).
- [Solan Starworks](#) develops inhibitors for second-generation NI, and retools the existing constructs to exist in a more symbiotic manner.
- The [Astral Vanguard](#) begins training 'Operators', who undergo training to symbiotically 'process' data with a compatible NI.

AR 900

20's

- Civil unrest in Outer System reaches boiling point, resulting in armed interventions by the [Astral Vanguard](#).
- Third Outer System Conflict begins, resulting in severe [Vanguard](#) casualties. Conflict ends after the rebel stronghold is captured, and most rebel forces disperse into the cloud surrounding the system.
- Lokpala X probe is lost in Claw Nebula.

30's

- [Freespacer](#) distress signal reaches Commonwealth space.
- [Astral Vanguard](#) recovery team searching for Lokpala X probe encounter Freespace race, the first encounter with another culture for over fifteen centuries.
- Unknown forces, later identified as the New Veyrin Republic, launch a series of small scale attacks, culminating in a space battle over the Capital.
- [VSV Astarte](#) battlegroup dispatched on fact finding mission to gain information on the New Veyrin Republic.
