

# Flormal

A synthetically created sedative used by the Abwehrans to reduce irritability and excitement in patients, Flormal is commonly found in Abwehran hospitals and military medical packages. Used in hyposprays, Flormal is relatively safe in moderate doses. Large doses can cause a person to exhibit the side effects of alcohol intoxication including staggering gait and slurred speech.

While therapeutic in nature, Flormal is easy to abuse. It can be easy to become psychological and physiological addicted to Flormal and is thus regulated strictly by medical practitioners.

- Suggested Price: 30 Credits per Vial
