Futuristic Food Ideas

In Star Army's technologically-advanced universe, there are new concepts that are not common in the present day:

- Insects may be raised as “micro-livestock.”
- Algae is commercially farmed and made into all kinds of foods.
- Foods can be preserved using edible anti-microbial polymer coatings.
- Stasis fields can be used to preserve foods.
- Meat grown from stem cells
- Automated restaurants and super vending machines that can cook
