

# GP-16 Plasma Pistol

A plasma pistol that was one of the last weapon types made by [WickedArms Industries](#).

Price: No longer sold new due to the closure of WickedArms, but available for 400 KS at a [Star Army Surplus Store](#).

## Overview

A pistol of the old school. Using plasma went out a long time ago, but for target shooters, low-powered plasma is better than any other projectile type for tracking shots and target hits, as it won't completely evaporate a target. Not that it isn't deadly as hell. While it's more expensive than a [GP-13 Pulse Pistol](#) and less common, they have the benefit of being very accurate and not as clunky as a GP-13.

## Stats

- Type: Plasma energy
- Class: Pistol
- Sub-class: Civilian pistol
- Base model: GP-16
- Sub-model: N/A
- Dimensions: 220 x 107.2 x 30 mm
