

# Mâqisumanâ'ka (Greater Forge)

Greater forge was the second settlement created by the [Poku Saeruo Degonjo](#) on [Âmuar \(Dream\)](#) in 754 CY ([YE 35](#)).

## About Mâqisumanâ'ka

Due to the condition of the planet when the clan came to claim it, the macro-engineers decided that the facility had to be an industrial facility. The settlement is built into solid rock, carve into a small butte. [Mâhoa Âdor \(Sky Harbor\)](#) was placed in the upper levels with lowering pads to make loading and unloading in the turbulent weather easier.

The settlement is some 5 kilometers wide and deep the height of the settlement is 1 kilometer. The cliff face side is covered in massive panels of [Mâqitua'tomin \(Transparent Light Metal\)](#) which allow sunlight to enter when it is available.

A farm was established a few months after the excavation of the settlement began, it is outside of the cliff wall and is 1 km x 1km in size. It is currently enclosed to keep out the dust storms.

## Purpose

Mâqisumanâ'ka was initially set up as a material processing center. It will help provide construction materials from salvaged material left from the destruction of the NMX presence and from the stone removed for the settlement.

## History

In the fifth month of 754 CY ([YE 35](#)) the [Wunyaka Vonai \(Ark\)](#) [Âmuar \(Dream\)](#) left the [Sotâka Ruomâqi \(World Station\)](#). It landed in front of the construction site and will serve as the control center for colonization.

In 759 CY ([YE 40](#)) the macro-engineers started the process to make the planet more hospitable to the Vonai (People). Massive [Ânamus norjopa \(Recycler\)](#) have been constructed and activated. They will remove the heavy particulates from the atmosphere and convert some of it to atmosphere components and other materials to help revitalize the soil.

## Civilization

- Type: [Poku Saeruo Degonjo](#) Colony
- Population: 750,000
- Society: [Poku'vonai](#)

# OOC Notes
