

Heavens

The Heavens were great floating cities above the surface of [Yamatai \(Planet\)](#) inhabited by [Elysians](#), forming the original empire of 'Elysia'. Most of the Elysians were exterminated within these, and [Ketsurui Yui](#) conquered them finally in [YE 15](#).

While maintained as a top secret even from the Elysian people the capital of [Elysia Novus](#) is in fact built on an enormous anti-gravity device - thus being a submerged heaven.
