

# Wazu Nebula

The Wazu Nebula is approximately 18 lightyears to the galactic south of the [Yamatai Star System](#), and to the galactic east of the [Fujiko System](#). The Sakura's Gap separates the Wazu Nebula from the [Great Southern Nebula](#).

As of [YE 43](#) it is located in space claimed by the [Yamatai Star Empire](#), and to the galactic east of [Democratic Imperium of Nepleslia](#) space.

## History

The Wazu Nebula was in heavily contested space during the [First Mishhuvurthyar War](#) between [YE 26](#) and [YE 29](#). Several [Yamatai Star Empire](#) systems like [Rufusland](#), [Fujiko](#) and [Hanako's Star](#) (Prior to relocation) faced being surrounded by [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#) controlled systems on all sides once the [Bard Cluster](#) fell in [YE 29](#).

In [YE 29](#) a Nermian Defense Initiative Unit, the 234th Carrier Battle Group, made transit through the Wazu Nebula on its way to provide support to [Star Army of Yamatai](#) forces that had engaged the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#) in the [Sakura's Gap](#).<sup>1)</sup>

The [NSS Acadia](#) performed several operations in and around the Wazu Nebula during the [Second Mishhuvurthyar War](#).<sup>2)</sup>

## Description

The Wazu Nebula is a massive cloud of interstellar gases and dust.

The Wazu Nebula is a [HII Region](#) nebula composed of mostly heavily ionized hydrogen gas. Several short-lived blue stars, namely Wazu-764 and Wazu-865 that ionize most of the hydrogen in the nebula with their ultraviolet emissions. It is considered a [stellar nursery](#), and will one day result in a more defined star cluster. The Wazu nebula tends to be more stable than some of the other nebulas in the [Kikyo Sector](#) and has not been known to cause any major interference with ship's systems or transit. <sup>3)</sup>

## Transportation

The only way to reach the Wazu Nebula is by starship or other craft.

## People

The Wazu Nebula has no permanent residents.
