

Aqueous

A [Yamatai \(Planet\)](#) type planet that is 80% covered by water. It is located in star system [SX-06](#).

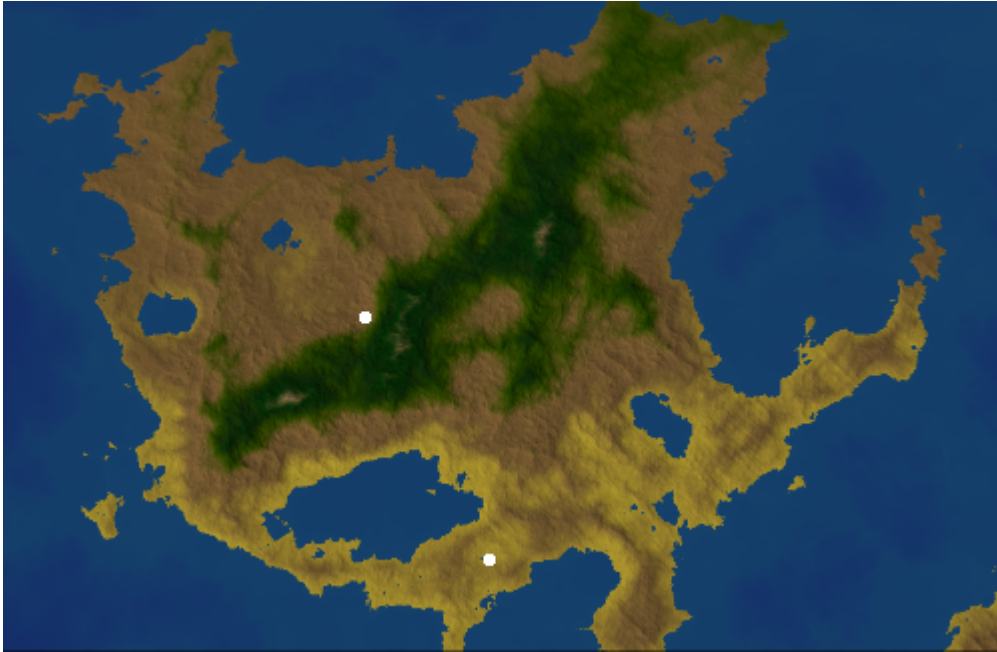

The planet life on Aqueous has a unique property in that it leaches significant mineral content into its leaves and such.

History

The [Yamatai Star Empire](#) placed orbital communications networks of [Emrys Satellites](#) around all of the terrestrial planets in [YE 36](#).

Varnan

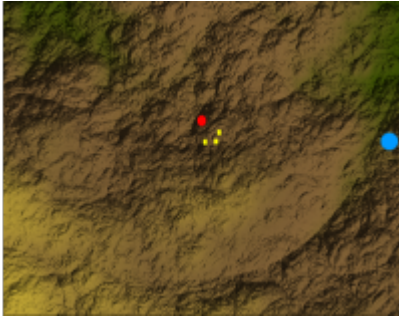

The largest continent on the planet was named Varnan because it seemed to resemble a sword carrying warrior with a cloak.

It was on this continent that the [Scientific Studies Service \(SSS\)](#) found an extensive set of ruins. The sites are indicated by white dots. The current [SSS](#) expedition is at the northern most site.
