

Jiyuu VIII

Jiyuu VIII is the eighth [planet](#) in the [Jiyuu System](#), it is part of the [Yamatai Star Empire](#).

About Jiyuu VIII

Jiyuu VIII has an orbit outside of the stellar plane, indicating that it either collided with something centuries ago which altered its orbit, or is actually a massive comet that was manipulated by Jiyuu VII's gravitational field. The latter is deemed more likely. It was discovered and studied in [YE 29](#) by the [YSS Akuro II](#), the flagship of the [Fifth Expeditionary Fleet](#).

Statistics for Jiyuu VIII	
Type	Ice Dwarf
Facilities and Bases	YES
Colony	No
Population	300
Moons	No Moons

Places to Explore or Salvage

Jiyuu VII has some interesting locations:

Ice Processing Facilities

The [Yugumo Corporation](#) has extensive ice processing and cargo terminals on Jiyuu VIII. Harvested blocks of ice are melted or kept frozen and shipped to other worlds in the [Yamatai Star Empire](#) that lack potable water. These facilities also supply freshwater to [Star Army of Yamatai](#) ships and bases.

Crash Site

The crash site of a [Asuka-class Scout](#), the *UCS Aio*, is present on the surface of the planet embedded in one of the larger glacial mountains. The ship crashed into the moon while trying to make an escape from the system in [YE 33](#), during the [NMX](#) attack on the system. No confirmation has been made on the condition of the crashed ship or its contents.

Extreme Cold Climate Testing Range

Construction of a Cold Climate Testing Facility for the [Star Army of Yamatai](#) is currently underway on the surface of Jiyuu VIII. It is expected to be completed in [YE 43](#) and will be an off-site training facility connected to [Fort Tokyo](#) on [Jiyuu III](#).

Orbital Assets

The [Star Army of Yamatai](#) established a "[Guriddo](#)" [Defense System](#) as part of the Jiyuu System Defense Plan laid out by [Ketsurui-Motoyoshi Katsuko](#) in [YE 42](#). The system includes:

- 20 [Ke-H5-W3200 "Kyouheki" Defense Platforms](#) each typically controls two [Ke-H5-M3200 "Nesuto" Docking Platforms](#), but can handle more.
 - 10 [Ke-H5-M3200 "Nesuto" Docking Platforms](#) each with 18 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)
 - 180 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)

The planet also has an orbiting network of [Emrys Satellites](#) for communications that were deployed by the [Star Army of Yamatai](#) in [YE 36](#).
