

# Rogue

Rogue is the fourth [Planets](#) in the [UX-27 System](#), it was explored by [YSS Aeon](#) in [YE 31](#).

## About

This planet is not native to the system. It traveled from elsewhere in space until it was captured by the sun's gravity. It orbits at 45° from the system plane.

Rogue has an extremely thin atmosphere. The surface of Rogue is dotted with large craters. What atmosphere does exist is extremely radioactive. A series of silicate lattices are noticeable from orbit near the polar regions. These lattices are in fact home to a silicon lifeform the Aeon crew named [Kamakiri](#) because of their appearance.

The crew of the Aeon named the planet Rogue due to its origin.

Statistics for Rogue	
Type	Terrestrial Rock Planet
Radius	4.2 AU
Period	21 hr
Gravity	.5 G
<a href="#">PAINT</a> Station	No
Facilities and Bases	No
Colony	No
Population	<a href="#">Kamakiri</a>
