

Takara

WIP (SA): This page's contents are a work in progress by the [Site Admin](#) and cannot yet be used in the RP.

The fifth planet of the [UX-27 System](#).

This planet has an atmosphere similar to [Yamatai \(Planet\)](#), oxygen and nitrogen in acceptable levels at a slightly higher pressure. It is a verdant world when viewed from orbit. There are three large land masses and oceans cover approximately sixty percent of the surface. This world is rich in minerals.

Located on the largest land mass an ancient city of unknown origin is large enough to be visible from orbit.

A small [Kamakiri](#) lattice exists in the heart of the great desert on the smallest continent.

The crew of the *Aeon* named the planet Takara (Treasure) due to the quality of the world.
