

# Operation UIFA

Operation UIFA is a [roleplaying](#) plot created June 26, 2017 by [GM zekec](#). It is located in a massive fleet of ships from mainly the Union, while Yamatai, Neshaten and even the I'ee sent ships. This fleet was brought together when long range monitoring of Kuvexian communications indicated an attack or invasion may be coming towards them, bigger then they have seen ever before. It was brought together for mutual defense of all peoples in this area of space.

**Status:** This plot is currently open for any approved character to join.

## Plot Overview

UIFA stands for the United Interstellar Fleet of Allies, and is split into several different fleets, Alpha, Beta, Delta and Zeta fleets. It was created to defend all planets and civilizations in the Kikyo Sector, no matter their opinion of others. We must all band together or be destroyed.

There is suspected to be a high-mortality rate, although it is entirely possible for you and your ship to make it out alive, we suggest creating brand new characters to bring into it, unless you recognize the risk that comes along with joining this plot. Posts will always be SP.

## Characters

Characters from the [gartagen\\_union](#), [I'ee](#), [kingdom\\_of\\_neshaten](#), [usostarorganization](#) and [star\\_army\\_of\\_yamatai](#) can currently be generated.

Characters will be officers in command of a ship from their respective faction. RP will be done in space or in person with the ship it self, or on board said ship. Characters can over time and at the GM's discretion be promoted and issued command of a superior ship. If Faction manager approval is granted, more ships from different factions will be allowed.

## Ship options for USO

- USO Excalibur Broad-sword Light Cruiser
- .
- .

## Ship options for Yamatai
